So.. UB doesn't support CTRL-GABBI or other built-in cheat. Cheat Enabler doesn't work on WinXP.. Any trainer I tried doesn't work..

There's any way to cheat UB under XP, or no chance at all?

thanks

It seems no trainer working on XP and with UB 1.01 has made too too bad, as the game is too hard (or at least too hard for me)
bye

I feel like there's a "but"..

For example, once I activated cheat, how they works?

I mean: all ALT-T, ALT-R, etc.. I was used to use in JA2, in UB don't work.. As soon as I've some time, I'll try out all key-combination.. But I'd like to know if it is useless

Thanks anyway.

bye

Actually all cheat keys works fine - both teleports, kill all, reload, make all visible, debug mode, etc. Except Ctrl + U (heal), which doesn't work, because it's already used in "Ctrl+beauty" combo... So maybe they ditched this cheat, or maybe remaped it to different shortcut.

There's one issue - some keys (wrong combination) turn off cheat mode, so maybe that's why it "didn't work" for you. Then again, exactly same issue is in JA2, so you shouldn't notice any difference...

Thanks a lot, Dvornik! I never asked for the cheats, because I thought that UB does not have cheats, but still it has. Vietnam SOG mode was so darn difficult to me so I already stopped playing, but when I readed this topic I can play it again! Like An Loc base where Ponder is: 32 enemies. How am I supposed to kill them all? Thanks again!

i apologize ..
you were absolutely right..

how did you found out?
and again sorry.

Eisenhower, no no no no, a big no-no. :nono:
Don't blame Dvornik of cheats that doesn't exist. You should've tried them out 'cause they worked.
CTRL + beauty and tada! Cheat level two reached!
You'll reach cheat level one with CTRL + beaut.
BTW, what does this "Cheat lever *number* reached" mean?

There's another way to "cheat" if you know how to use the UB editor and have a little patience. You don't even have to know how to use it well, as long as you understand the most basic requirements for a map (i.e. 5 entry points and 32 enemy placements).

Just create a "bare" map (with no enemy presence) in a sector adjoining H7 (G7 works well), and place in it whatever weapons, armor, and equipment you want. Arm everyone with fully-customized Barretts if you so desire. Now you're off to a great start to the game (You have to select your modified campaign though).

Yea, that's a good one wyoming. I've used this cheat in order to test play the custom map I'm working on without getting mopped up. I take a small team and arm them with full spectra, HK21s, plenty of regen boosters etc. so I can move through without too much trouble testing what needs to be looked at.

Dvornik, thanks for your help, with regards the CTRL-U key not working, do you know which key now heals merc and much better do you know all the keys (or a link) thanks

Cheers
