I bought some stuff from I believe her name was Fung, but did not see anything to repair a laptop, I have killed the cats in the warehouse so she said she would sell all her stuff, what is it that I have to buy.

I have purchased everything that remotely looked like anything like a computer part and still nothing works. I am at a standstill so I guess I will have to give up and do something else.

Unless somebody has a suggestion as to how I can change something to get by this thing.
