I get downloader swizzle virus alert in avg 9 for the exe on the new full English translation. It will not install unless added to the exception list. Possible false alarm, however my avg database is up to date.

inshythere is no viruses in installer. i promis you I've just updated to AVG 9 today. It's indicating that a load of files are infected with downloader swizzlor, including the Night Ops exe, which was already installed.

Hello T_Bolt,

There is no reason to worry! That's just the MapConvert file located in the \NopsMod\Data\Maps folder. You can ignore this virus alert.

Btw: Once again thank you inshy for your translation work!

Best regards; Schein

Except that AVG 9 was giving the alert for the Night Ops JA2 exe, not the installer or map converter and the other infected files had nothing to do with JA2.

I had to delete it from the system restore areas for days after the initial alerts. Great mod. Just wish you guys would fix this so I can install safely.

As far as I know , there is no virus in NOps , I have had it on my pc for a long time now .
Stop worrying , just play.....
