Hello!

First of all, thank you everyone for making and testing this amazing mods
I have been playing Jagged Alliance since the game came out, and now JA2 is still my favorite
game.
I have been trying all mods, but I'm having some trouble with this one... Can someone help me to
change the resolution? The .ini on the Data-Renegade folder doesn't seem to have this option...
thanks!

Change resolution in the ja2 ini in main folder , by the way , it doesn't actually say ini next to the
icon , mine is directly under the ja2 exe .

Thanks Lockie, but changing the ja2 ini is only going to affect the main game, and it's going to
conflict with the mod...
I think I need to change the ini in the data-renegade, but I can't find that option on the file!

If that option is available, it's in the JA2.ini in the root folder. If it's not there, it's not possible.

(Was there a pre-1.13 RR? I'm not fully up to speed with the 'old' mods.)

Well... then it seems it is not possible to alter the mod's resolution

Renegade Republick was initially JA2 mod and not 1.13.

It IS possible , using the method I outlined .

Edit : make sure the data configuration (within the ini I have mentioned) says data-renegade ......

Thank you, but I tried as you said and it didn't work.
I changed the ini on the main folder, and when I re-started the mod, after the scorpion screen, it
was kind of a mix between the main screen and the start screen, and then it crashed.

@Lockie:
Perhaps you are using the RR-1.13 release then?

@SpookyGirl:
Where did you get the mod (link)?

That's a good question, I honestly don't remember...   :confused:
Do you think this error may be due to a 'bad' version? Can you tell me a good link, then?

http://kermi.pp.fi/

It's here , in 1.13 mods

Thank you very much for the link :thumbsup:
I'm having the same problem. The file Ja2options.ini in the Data Renegade folder doesn't have the resolution screen option! I dind't read line by line, but I searched for 'resolution', 'screen', etc., and nothing appeared.

Thanks again everyone, it's not a big deal. I'll play with the original resolution, no prob

SpookyGirlThe file Ja2options.ini in the Data Renegade folder doesn't have the resolution screen option!

Again: The Ja2options.ini NEVER EVER has any option to switch screen resolution AT ALL!
If you play the RR-1.13 Hybrid from lockie's link, the switch for resolution change is in the JA2.ini.

Finally!!!
Thanks guys Looks like I had a bad version... I installed the mod from Lockie's link, and I was finally able to edit the ini.

Lol now I just hope the mod is worth it

Hi SpookyGirl,

just wanted to say you have got a P.M.!
(You can see your private messages in 'My Stuff'.)

Best regards; Schein

So we might just set a custom value, aside the three default ones? (640x480, 800x600 and 1024x768)
