Not sure what exactly is breaking it, playing most recent unstable 1.13 version, 8 merc squads, face gear icons on. Hitting space or clicking a merc portrait just makes the blip thing appear but I can only move the merc the game gives me. Not only that but pressing d doesn't finish turn, and mercs walk backwards.

Saibot...and mercs walk backwards.
This is the universal hint of ALT key staying pressed after "ALT-TAB"ing to desktop then returing to game. Are you sure this is not the issue? Because you can easily fix it by pressing ALT once.

It was the alt key, thanks.
