Can anybody recommend me any good PC games featuring a lot of weapon customization? Or at least lots of weapon choices...

Well, besides JA, that is...

And preferably with a modern real-world setting (so, no sci-fi/futuristic titles) and offline/single-player (on a good day I can play a bit of Battlefield 3 on nearby servers, and seeing DayZ Overpoch videos make me drool... but my country has been 'blessed' with a communications minister who -literally- questions the need for hi-speed Internet access).

Cheers...

7.62 with Blue Sun Mod. Squad level tactics, RTwP, rivals 1.13 in weapon choices and customization.

Ah, I've tried 7.62 many moons ago (my copy should still be here somewhere), but I've never heard about mods for this game. Thanks!

Blue Sun Mod is pretty much a must have mod for 7.62 I must say.

I know you already have a copy but the Steam version comes with the bluesun MOD latest version built in (switchable)

Its \$4.99 when not on sale.

To switch to the modded version, open Steam properties of the game (right-click on the game entry in Steam library), go to Betas tab and select 'community_patch_and_bsm' from the drop-down list.

French version of the mod is not yet available, so please select English if you want to play a modded version.

The Blue Sun Mod for 7.62 High Calibre version 1.11 build 286 compiled by R@S [Steam]
