[View Forum Message](#) <> [Reply to Message](#)

---

As the First AIMNAS Item request thread reached 10 pages, I decided in old Bears Pit tradition to start a new thread.

The same rules as in the first thread apply:

-> You can sugest next to anything you would like to get added.

-> No gazillion AR-15 or Ak-47 variants please. We already have quite a few of these in game, adding more requires more than just being tacticool.

-> If it's useful or new, chances are higher to get added.

-> 6.5mm Grendel is on my to-do list, I will sooner or later add it. No reason to constantly ask for it over and over again. done!

-> You can request food items, as I began adding them to AIMNAS.

-> Stuff that made it in can usually be viewed in the AIMNAS Art Gallery.

I'm surprised they were using methamphetamine instead of amphetamine, but I suppose back then they may have not known about the toxicity difference. Or they were desperate. Low-dose amphetamine is still issued in the behind-enemy-lines kits of some units, I think.

There's already a crossbow in the game, and a dart rifle.

I'm not sure if there's any reality behind it, but Crysis and maybe Splinter Cell had underbarrel-mounted paralytic dart launchers.

It's terrifying to think about, but we may be running out of guns!

smeagolPepper79What about an aperture sight?

Something like this?

yes exactly, it might work as a low end scope for Western style and bolt action rifles, I just don't know if it's worth the effort to put it into the game, but that's up to you. As far as I know aperture sights were the forerunners of scopes, nowadays there are used on sporting rifles, especially air guns.

GambigobillaI believe Smeagol hates single-shot hi-caliber pistols, that's why he removed contender encore (or whatever its name) from AIMNAS, the only gun which exist in vanilla but not

in AIMNAS.

I wouldn't exactly call it "hate"... those guns are just really easily outclassed by basically every other gun, making them next to useless. I don't see a real reason to have have them in game.

The Contender falls short in many ways. As I see it, the pull of a single-shot pistol would be high accuracy and damage with decent range in a fairly small package. As far as I know, there are some .308 and .30-06 pistols out there. Tasty.

That can't be fun for the wrists...

Quote:tokarev in 9x19 can be nice for sure,same for 1911 clone in 9x19 or .40 s&w[para ordonance manufacturing some models],gsg manufacturing some replicas in .22 lr

But what's the point in all these pistols being added?

The point of the vast majority of guns in AIMNAS is to have variety, not only in looks but in function, don't want to have Smeag wasting his time on trivial designs when we have the same weapon functionally speaking.

The PET bottle silencer would have to be a onetime use item. Don't think that is possible at the moment. I like the idea , though (yes, I've also seen Shooter...).

As for the UGL. Making a stock for the UGL to use as a standalone is next to pointless at the moment, as you can fire all UGLs without a gun/stock they are attached to. Unless that gets a change somehow (like -> if item is UGL it can only be used if it is attached to something. Problem solved), no need to add stocks that take UGLs.

Vince7403The BML looks interesting - is the game capable of handling box magazine grenade launchers?

Yes. This is basically the same as the Milkor/Xm-25 and the like. Nothing spectacularly new here.

Only thing different would be reloading time. When not fed from a magazine you would need very low Ap costs for each single round to get loaded. So the basic idea of having a GL that has more than one round capacity is already in (some GL even used to have magazines before, but that didn't allow to mix different kind of greades, like the 20mm and 25mm grenade mags of the aforementioned XM-25 and the OICW... even the metalstorm 40mm stacks use the same principle).

For the plastic bottle suppressor, would it be possible to program it as non-repairable, with an extremely low durability? If I understand properly, that might be a way to make a single-use item.

The Beardmore-Farquhar MG is an interesting looking weapon, if nothing else. Apparently it was never adopted by any armed force, which could mean it wasn't very reliable.

I've been reading about RPG ammunition lately, so I've noticed an inaccuracy in naming. The

picture represents a PG-7V/PG-7VL grenade, not OG-7V. Photos under the spoiler:  
Toggle Spoiler

From left to right: PG-7VR, PG-7VL, TBG-7V, OG-7V

So how do you think, can proper OG-7V "Oskolok" ("Splinter") be added and the existing grenade to be edited for a right name? It's a fragmentation grenade with really low explosive charge and body with incised segments which create a cloud of fractions in all directions upon explosion. I was thinking about that shrapnel effect used in some grenades. It might be a cheap (\$700-800) option against infantry, no way this thing to make huge holes in walls or make damage to tanks. Deidranna's commandos might like it since rebels don't have so many materiel, but this tool comes in handy when you need to take back that SAM.

Some technical info and more photos for OG-7V "Oskolok" under the spoiler.  
Toggle Spoiler

Real life stats:

Weight... 2.0 kg

Fragment spread radius... up to 70 m

Pictures:

Agree on OG-7V, the picture is wrong, this type of rpg has unofficial name of "pencil" for it's shape.

Some sources say that this grenade does not have jet engine, and that results in greater accuracy.

As for the bottle silencer I have read that if done properly the bottom is cut out and you can fill the bottle with insulating compound leaving a shooting tunnel for best success. This allows various shots, it is however only suitable for handguns and smallbore rifles.

Maybe it can be treated like the barrel extension, that it falls off after a few shots but cannot be reattached?

With the right kind of targets, maybe... but atm we have no real need for an overpowered anti-material rifle. Even the .50 BMG and 12.7 guns are already overpowered.

My secret hope still is that someday we get light armored vehicles (to replace the tank or as an addition). Once that happens, I'm happy to add more stuff to deal with it.

Any thoughts on crummy, underground workshop made weapons? As in the Sten gun clones made from junk that the Polish Resistance made, slam-fire pipe shotguns, or the bastard gun from Metro 2033 (made from broken AK's and plumbing parts)?

I was thinking that, if possible, these could be the sort of weapons that militia get if you don't provide them with anything yourself.

Exactly the 3 round 12 gauge ammo items are the ones that are missing atm.

As much as I like the idea of a three barrel gun... urgh... it means adding another 7 items for ammo (not such a big deal, really) and re-ordering 70 items in the xml (which is very tedious). Not sure yet.

Maybe, maybe not.

I did add a Metal Storm Pistol and a Glock in 4.6x30 (sci-fi item) lately, though.

Metal Storm Pistol

Glock 46

Currently fixing some inconsistencies... adding C-18/C-20 variants of all helmet type items (including Steel helmet, Camo helmet, M42 Stahlhelm, M1 US helmet, Brodie Mk. 1 ...). No red / green pics yet, though... maybe at some later time if I'm really bored.

I can't remember if it was ever brought up before, but have you looked at Aguila mini-shells? 12-gauge, 1.75" OAL I think. They cycle in the Winchester 1200 and 1300 without modification and I think the MAG-7 shotgun is built around them.  
<http://world.guns.ru/shotgun/safr/mag-7-e.html>

How about something in .510 Whisper? I suppose it may be too similar to the 12.7x55mm already present though. To be honest I think we'll be hard pressed to find much new stuff that isn't in unconventional calibers.

Needs animation and I don't see a real advantage of a recoilless gun over an RPG in game terms, as there are no real targets, beside the tanks. Also those things are super heavy and slow to fire.

The pic has good quality. Should be doable.

Scrap that... the perspective is bad. Makes the item look very tiny if reduced in size and there's not much left of all the detail in the pic.

Ultra-low-budget reflex sight Just the fact that this exists is hilarious, to me anyway.

While it's not necessarily very practical, this slightly unusual rifle scope is kind of interesting. It looks like an absolute monster on paper, but rumors suggest the company that allegedly manufactured it may not really exist, the gov't specification markings may be fraudulent, and the build quality supposedly varies hugely between pieces.

Vince7403 Ultra-low-budget reflex sight Just the fact that this exists is hilarious, to me anyway.

While it's not necessarily very practical, this slightly unusual rifle scope is kind of interesting. It looks like an absolute monster on paper, but rumors suggest the company that allegedly

manufactured it may not really exist, the gov't specification markings may be fraudulent, and the build quality supposedly varies hugely between pieces. I've used many of those on my paintball markers over the years... broke so many that when I switched over to the lower profile fake reddit that I bought a spare (both survive, one is even still in its original packaging). Then I gave up on aiming and got something with a cyclone feed and make up for lack of skill by volume.

---

---

wil473 Then I gave up on aiming and got something with a cyclone feed and make up for lack of skill by volume.

That actually made me chuckle...

Well, the dirt-cheap reflex sight seems kind of meh... might add it, probably won't though (don't know yet, what disadvantage such a cheap piece would get. Having it damaged when using a lot of auto-fire would be nice, but not possible at the moment, also restricting it to a very limited amount of cheap guns could work, but would not make much sense. At least it would give a reason to actually use the cheapo guns).

@Slax: yes, I'm using an old PS version as well for item reduction. Looks almost like the one I made for tests, I find it to have an odd view angle and thus it looks a bit confusing. You made it a bit larger than I did, though. Thus the quality looks a bit better, but I'm not sure if the scale fits with the other EPAs and MREs I already have in game.

Also, I think we need an update to EDB soonish that will show mercs personal opinions on food, now that we have the option. I will probably post a feature request for that soon.

They're intended for air guns as far as I know:

Should work on smallbore rifles, if found early in the game in normal houses or super markets, they could even make sense.

Well... it even says on the packaging, suitable for .22 guns... That would work, yes. But why wouldn't you be able to also mount it on any other gun, then (of course in real life this would have quite a few issues, I could imagine...). Simply not allowing it on other guns is a cheap workaround, but could do.

I'm wondering that there is no Eotech holosight in the game, since they seem to be quite popular among gun enthusiasts

I also suggest a magnifier if the coding allows it, the magnifier is no functional sight on its own

---

---

Pepper79I also suggest a magnifier if the coding allows it, the magnifier is no functional sight on its own

Not necessarily a specific code feature for magnifiers, but New Attachment System (NAS) does allow an attachment to add attachments - this is how the "Advance Reflex Sight" EOTech clone in AFS/DL-1.13/UC-1.13 handles magnifier and Night Vision addons.

Grenade Launchers!

The WW2 German Sturmkampfgewehr. 26mm (easy to convert to the already existing 25mm). It is a shortened 98k and uses the same action so that improved Mauser action should also work on it.

Then there is the new South African 20mm PAW-20 Neopup. For a stand alone launcher for the 20mm OICW grenades.

By the way, I have pics and info on hundreds and thousands of small arms.

[http://www.ja-galaxy-forum.com/ubbthreads.php/topics/323256/Common\\_AFS/DL-1.13/UC-1.13\\_Wea](http://www.ja-galaxy-forum.com/ubbthreads.php/topics/323256/Common_AFS/DL-1.13/UC-1.13_Wea)

Yes, I know that pic, but I don't like it too much. I also know the standard pic you can find all over the web (the yellowish-tan variant with the angled view). That one with a sideview would be perfect.

I find the idea of a 20 round 5.7 SMG combined with a 4 shot 40mm launcher quite intriguing, though the thingy is obviously quite bulky...

[View Forum Message](#) <> [Reply to Message](#)

---

I second the SIG MPX. I would really love to see some .357 SIG guns in the game. You also get conversion kits for a lot of .40 S&W handguns to convert to .375 SIG since the .40 is its parent case. Generally similar ballistics to the .40, but with more reliability.

The .357 SIG Glocks and SIGs are fairly popular with gun enthusiasts too.

---

I've hesitated to suggest .357 SIG, but if Smeagol is interested I would also like to suggest .400 Cor-Bon. Slightly less powerful than 10mm but has lower recoil and almost any .45 ACP weapon can be converted to it with only a barrel change, sometimes also a recoil spring.

---

I'm mostly out of ideas for new gear for now. Almost everything I think of is either a variant of a common weapon or would require adding a new caliber.

The Houlding Wraith is another AR-15 variant, but it's very different looking at least.

If you're willing to add 8mm Lebel, that opens up the WWI French arsenal, plus the Chauchat, which could turn up as a joke weapon. Bobby Ray could sell them as "historical curiosities" in the used section.

Here we go.

Will very likely add it in one of the under used calibers (probably .300 WM).

How about the Center Mass shotgun laser? Draws a circular pattern that grows with distance at about the same rate as the spread of shotgun pellets. It's mostly meant for shotguns but the manufacturer displays it on a rifle, oddly enough.

smeagolHere we go.

Will very likely add it in one of the under used calibers (probably .300 WM).

Wow that was fast :bluecool:

I would have chosen 8x57 since there are few semi-automatic rifles in this calibre and it is a strong calibre as far as I know but thats you're choice.

True, but it's a question if you want each caliber to somewhat cover all roles or if you want to encourage more specialization (and more logistics problems for the player :luckystrike: ).

Pepper79

I would have chosen 8x57 since there are few semi-automatic rifles in this calibre and it is a strong calibre as far as I know but that's your choice.

If by 8x57 you mean 7.92x57 Mauser, there's the good ol' 98, the G43, the Mauser M02-something, the FG-42 in two variants, several MG variants, etc... where as a caliber like .300 WM could really use some decent options.

Might be adding the gun in several calibers, which shouldn't be too hard anyways... maybe with a slight recolouring of the stock even...

Browning BAR might be a good pick for a fairly early .300 WM alternative. Winchester, CZ, Tikka or Steyr. Those guys should have some of that goodness too.

Seems the Browning BLR comes in .300 too. Lever-action.

Then there's Blaser of course.

Hello Community, it's been years since i played JA2 and recently got it over the Steam Sale and tried with 1.13. and AIMNAS and it's great. But, and i know it's kinda impolite for my first post, i got suggestions for stuff to add in:

Machine Guns (Mostly Variants of existing ones):

M60E4/ MK43 mod. 1 (kinda tactical M60:

<http://world.guns.ru/machine/usa/m60-e.html>

Mk46 mod. 0 LMG (SOCOM-Variant of the SAW):

<http://world.guns.ru/machine/usa/m249-saw-e.html>

MK48 (big brother of the SAW/ M249):

[http://en.wikipedia.org/wiki/Mark\\_48\\_machine\\_gun](http://en.wikipedia.org/wiki/Mark_48_machine_gun)

MG3 KWS (Upgraded MG3):

[http://www.rheinmetall-defence.com/de/rheinmetall\\_defence/public\\_relations/themen\\_im\\_fokus/en/twicklungsschwerpunkt\\_effektoren/index.php](http://www.rheinmetall-defence.com/de/rheinmetall_defence/public_relations/themen_im_fokus/en/twicklungsschwerpunkt_effektoren/index.php)

M240L (lighter upgraded Version of the M240):

<http://www.fnhusa.com/l/products/machine-guns/m240-series/m240l/>

[http://upload.wikimedia.org/wikipedia/commons/1/1f/PEO\\_M240L\\_MG\\_Telescoping\\_Stock\\_Right\\_Side.jpg](http://upload.wikimedia.org/wikipedia/commons/1/1f/PEO_M240L_MG_Telescoping_Stock_Right_Side.jpg)

M27 IAR (LMG-Version of the HK416):

[http://en.wikipedia.org/wiki/M27\\_Infantry\\_Automatic\\_Rifle](http://en.wikipedia.org/wiki/M27_Infantry_Automatic_Rifle)

Shotguns (some alltime favorites):

Remington 1100:

[http://en.wikipedia.org/wiki/Remington\\_Model\\_1100](http://en.wikipedia.org/wiki/Remington_Model_1100)

Mossberg 590:

<http://www.mossberg.com/products/shotguns/pump-action/mossberg-590-special-purpose>

Assault Rifles (with exchangeable Calibers):

Remington ACR:

<http://www.remingtonmilitary.com/firearms/carbines/acr.aspx>

AK-12 (yeah, i know we have a lot of AK-Variants already, but from this one there's also a RPK and SVD-Version):

<http://en.wikipedia.org/wiki/AK-12>

[http://media.desura.com/images/groups/1/2/1312/AK-12\\_Kaliber.jpg](http://media.desura.com/images/groups/1/2/1312/AK-12_Kaliber.jpg)

<http://i45.servimg.com/u/f45/17/75/32/69/aku1210.jpg>

Rocket Launchers:

AT-4 CS:

<http://en.wikipedia.org/wiki/AT4>

RPG-18 (Russian equivalent to the LAW):

<http://en.wikipedia.org/wiki/RPG-18>

Pistols (basically just one):

Glock 21 (in .45)

How about some competition glocks like the 34/35/36?

SMG:

HK 416C (SMG-/ Carbine-Version of the 416):

<http://photos.imageevent.com/smglee/ss11/huge/P1050713.jpg>

Last but not least various attachments

Optics:

Aimpoint Optics:

<http://www.aimpoint.com/segmentval-row-landingpages/military/>

I suggest the CompM2/ M4 and the Micro-Aimpoint which seem to be the most common ones, maybe with the ability to add a magnifier

[http://en.wikipedia.org/wiki/Aimpoint\\_CompM2](http://en.wikipedia.org/wiki/Aimpoint_CompM2)

[http://en.wikipedia.org/wiki/Aimpoint\\_CompM4](http://en.wikipedia.org/wiki/Aimpoint_CompM4)

<http://www.aimpoint.com/products/all-products/product-singleview/product/Micro%20H-1/>

Elcan Specter DR (Dual Role Sight):

[http://www.elcansightingsystems.com/products/dual\\_role\\_sights.php](http://www.elcansightingsystems.com/products/dual_role_sights.php)

The new ACOG 6x48:

[https://www.trijicon.com/na\\_en/products/product3.php?pid=TA648-308H](https://www.trijicon.com/na_en/products/product3.php?pid=TA648-308H)

Russian Optics:

<http://russianoptics.net/1P78Kashtan.html>

<http://russianoptics.net/1p29.html>

Grips:

Surefire Vertical Foregrip Weapon Light:

<http://www.surefire.com/illumination/weaponlights/rifle-carbine-smg/verticalforegripweaponlights.html>

Magpul AFG:

<http://store.magpul.com/product/MAG411/rails>

Weapon-Laserpointer:

AN/PEQ-15:

<http://www.eotechinc.com/tactical-lights-lasers/atpial-anpeq-15-restricted-advanced-target-pointer-illuminatoraiming-laser>

Magazines:

Magpul PMAGs in different calibers (aybe with a Bonus for faster reloading?):

<http://store.magpul.com/category/PMAG>

Weapon Attachements:

M320 Underslung Grenade Launcher:

[http://en.wikipedia.org/wiki/M320\\_Grenade\\_Launcher\\_Module](http://en.wikipedia.org/wiki/M320_Grenade_Launcher_Module)

MetalStorm 3GL Underslung Grenade Launcher:

<http://www.thefirearmblog.com/blog/2009/10/02/metalstorm-3gl-grenade-launcher-wow/>

M26 MASS Underslung Shotgun:

[http://en.wikipedia.org/wiki/M26\\_Modular\\_Accessory\\_Shotgun\\_System](http://en.wikipedia.org/wiki/M26_Modular_Accessory_Shotgun_System)

So that's it, maybe you guys like the ideas.

Polymer-frame 1911, not available yet but could be interesting  
[http://rockriverarms.com/index.cfm?fuseaction=category.display&category\\_id=559](http://rockriverarms.com/index.cfm?fuseaction=category.display&category_id=559)

SIG 556xi, hugely modular, also available in .300 Blackout and 7.62x39  
<http://www.sigevolution.com/sig556xi>

Speaking of 300 Blackout, there's the Ruger American Ranch bolt-action,  
<http://www.ruger.com/products/americanRifleRanch/specSheets/6968.html>

If you're looking at adding different kinds of flashlights, may I suggest some of the monster taclights Surefire makes or used to make? There's the Dominator, though they don't make those anymore, and the Guardian, now available in LED.

Second the SIGs, .300 still needs some love and 7.62 can always use another western rifle to offset all those AKs. Also, the Mil/LE version of course comes with FUN!-mode.

Oh, also found another interesting little thing:

Egyptian Hakim rifle in 8x57. It's a copy of the Swedish Ag42, the action of which was later used in our all favourite, the AR 15.

Does Aimnas feature any makeshift weapons? I think they would fit within the setting of the game as they could be used by militia and be somewhat realistic.

Also do you have a pipe shotgun - something that would be easily concealeable for a covert type merc. It could also be crafted by doing Pipe + Ductape:

Surefire has brought back the Dominator flashlight, now with 1200 lumens on maximum power. Uses 12 CR123A batteries. <http://www.surefire.com/illumination/flashlights/udr-dominator.html>

The ARAK-21 is an AR-15 conversion to use an AK-like gas system, with adjustable gas piston, available in 5.56, 7.62x39, and .300 BLK. Anything that uses a 7.62x39 can be converted to 6.5mm Grendel with only a barrel change, but whether they'll do it remains to be seen. The recoil system is at the front, so it accepts folding stocks.

<http://www.faxonfirearms.com/c/23/arak-21-complete-rifles>

[http://www.faxonfirearms.com/images/g1\\_big.jpg](http://www.faxonfirearms.com/images/g1_big.jpg)

SIG is manufacturing suppressors with self-centering threads, among other features, so they supposedly offer better consistency than most others available.

[View Forum Message](#) <> [Reply to Message](#)

---

Ha! I found the ultimate reason why 17 is not awkward. By using 17, 7.62Tok becomes the only calibre to have an Emirp and its mirror among its set of capacities. Now is that awesome?

---

---

Subject: Re: AIMNAS Item requests Part 2

What about some .500 Magnum ([http://en.wikipedia.org/wiki/.500\\_S%26W\\_Magnum](http://en.wikipedia.org/wiki/.500_S%26W_Magnum)) Rollies?  
There are 3 Commercially made revolvers chambered for the .500 Mag.

[http://en.wikipedia.org/wiki/Smith\\_%26\\_Wesson\\_Model\\_500](http://en.wikipedia.org/wiki/Smith_%26_Wesson_Model_500)  
[http://en.wikipedia.org/wiki/Taurus\\_Raging\\_Bull](http://en.wikipedia.org/wiki/Taurus_Raging_Bull)  
[http://en.wikipedia.org/wiki/JTL-E\\_.500\\_S%26W\\_Magnum\\_12%22](http://en.wikipedia.org/wiki/JTL-E_.500_S%26W_Magnum_12%22)

The last of the three is rated as the most powerful commercially produced handgun in the world.  
Did I mention you can successfully hunt elephants with a .500 Magnum rollie? (at around 50m ofcourse)

These are the three non-commercials chambered for the .500 Mag.

[http://en.wikipedia.org/wiki/John\\_Ross/Performance\\_Center\\_5%22\\_.500\\_S%26W\\_Magnum](http://en.wikipedia.org/wiki/John_Ross/Performance_Center_5%22_.500_S%26W_Magnum)  
[http://en.wikipedia.org/wiki/Ultimate\\_500](http://en.wikipedia.org/wiki/Ultimate_500)  
[http://en.wikipedia.org/wiki/Magnum\\_Research\\_BFR](http://en.wikipedia.org/wiki/Magnum_Research_BFR)

The last one is chambered in a few calibers already available in AIMNAS (hint hint).

Now I am not a fan of rollies in general, but I am a fan of massive firepower.

## M24A2

Remington has developed an improved version of the M24 rifle, known as the M24A2. The A2 model features a detachable 10-round magazine, top-mounted and adjustable side-mounted Picatinny rails (advertised by Remington as "MARS", or Modular Accessory Rail System), barrel modifications designed to accommodate a sound suppressor, and an improved H-S Precision PST-25 stock with adjustable cheek height and length of pull. Existing M24s can also be converted into M24A2s, which replaces the stock and adds the new detachable magazine feed. The conversion requires a re-barreling of the weapon so it can take the OPS silencer.

or maybe m24a3 sws  
M24A3

Remington developed the M24A3 SWS, a variant of the M24 chambered for the .338 Lapua Magnum round (8.58x70mm) and feeding from a 5-round detachable box magazine.[9] It comes tapped for the Leupold Mk 4 M1LR/T 8.525x50mm Variable Power day scope. It can also use detachable front and rear Back-Up Iron Sights in an emergency (BUIS units are standard accessories that can be fitted to the Picatinny Rail that runs on the top of the receiver and along the barrel).

How about the Chauchat in .30-06? Awful weapon, but apparently Chauchats really do turn up in backwater war zones even 100 years later.

The Chauchat in 7.5mm Argentine was apparently pretty decent, but probably not worth a new caliber.

If Smeagol would be willing to add Aguila mini-12g shells, that opens up the Mag-7 shotgun-SMG,

---

which I always thought was rather interesting : <http://world.guns.ru/shotgun/safr/mag-7-e.html>  
In tube magazines the shorter mini-shells increase capacity by 40% or so. The Winchester 1200 and 1300 will chamber mini-shells without modification. Other pump shotguns will accept them with modified feed mechanisms. I don't think I've ever heard of a semi-auto that would cycle them.

Mini-shell muzzle velocity is about the same but the payload is reduced compared to standard rounds - mini-buck shoots 11 pellets totalling 19.5g, as opposed to 8-9 pellets totalling 28-32g for a standard shell. Recoil is reduced as a result as well.

Mini-shells are made in buck, bird, and slug, though birdshot probably isn't worth including. The slugs are 24.5g.

I'm sorry if any of this is already in the game, but here are some cool items that I think you add even more variety to your already extensive mod! I will be infinitely grateful if you add these to your mod!

Exotic ammo, grenades and landmines, oh my!

Format: weapon name (what it is) [recommended differences from similar items]

Explosives:

POMZ landmine (Stick mine)[cheaper, easier to set up, lesser damage, less reliable]

M15 WP (White Phosphorus grenade) [more of a gradual smoke (as opposed to m34's burst), longer lasting, smaller radius]

Model 308-1 Napalm (Napalm grenade) [N/A]

Mk 141 Mod 0 (Flashbang) [better throwing distance, weaker/shorter lasting stunning effects]

T13 Impact Grenade (Impact HE grenade) [better throwing distance, little to no fragments, defensive],

M84 (Impact Flashbang) [more stunning, less flash (aka short but strong stunning effects)],

M9143 (Small cylindrical grenade body that can be filled with most in-game fillings(tear gas, smoke, etc.)) [like a mini variant of canister grenades, better throwing distance, smaller radius]

RKG-3 (Anti-Tank grenade) [grenade that can effectively be used against tanks]

RPG-43 (Anti-Tank grenade)[much more explosive version of the RKG-3, but heavier and more difficult to throw]

No.74 (Sticky Anti-Tank grenade) [sticks to target, power comparable to RKG-3]

Shotgun Ammunition :

Dragon's Breath (Incendiary) [N/A]

Birdshot (Smaller buckshot, many, many more pellets)[High damage against unarmored targets, bad range]

0000 Buckshot (Giant buckshot, few pellets)[Like multiple, slightly weaker/ less accurate slugs]

M855 Steel Core Shot (Cores from bullets, about 40 in a shell) [Like birdshot but with better range/less spread and better penetration, a compromise between flechette and birdshot]

Piranha [Steel tacks + #12 birdshot] (Insane damage against unarmored targets, laughably poor range)

Images: [imgur.com/lfpEWsD](http://imgur.com/lfpEWsD) (sorry can't post images)

I'd be willing to go really far out of my way to get these in the game (to the point where I make them myself and merge with this mod). I have an unreasonable amount of free time and would be delighted to spend it adding to the best JA2. Asides from that, thanks for all you've done so far!

MRO-A would be nice, it's a single shot lightweight thermobaric launcher.

Article: <http://world.guns.ru/grenade/rus/mro-a-e.html>

It has shorter range and lower damaging ability, yet significantly lighter in comparison with Schmel-M which is present in AIMNAS: <http://world.guns.ru/grenade/rus/rpo-m-shmel-m-e.html>

Some photos:

Would be nice if the MG-3 got some love. I may be mistaken, but as far as I remember, the MG-3 was unable to accept any substantial attachments besides a reflex sight (and I'm not even sure it was able to take that) So I'd like to have a RIS version of the MG-3. It even allows for a retractable stock and flashlights/lasers. Pretty shmexy eh?

Whaddy say Smeag?

If you want me to do the graphic changes I can do that, I got time.

How about the ability to create makeshift bandages out of rags? I'm always running out of 1st aid kits in early game, and some really bad battles I'll go through 3-4 full kits. The makeshift bandages would have to have some penalty, however.. Maybe they can't stop 100% of the bleeding, just enough to let the merc last a few more hours? This would be by leaving 2-5 HP in the yellow for the slow bleed effect. Mercs could be rebandaged every hour or two (long enough to arrive at next sector) as the slow bleed drains them down, but again not being able to get back up to 100% bandaged. If you've got a hastily-bandaged merc at 15 HP, they'd fade in and out of consciousness as time goes on, until you finally run out of rags.

I hate it when I win a battle, only for 2-3 of my mercs to die 5 minutes later because they have 20 unbandaged HP.

(Edit: instead of double-posting) In general, it does seem that medical supply diversity is rather low in vanilla JA2, especially when you compare to AIMNAS weapons, and even the addition of cleaning kits and the Technician trait. If Tony Stark can build a miniaturized arc-reactor and an iron man suit, IN A CAVE, WITH A BOX OF SCRAPS (sorry, didn't mean to yell, I just like to use that quote when I can), why can't mercs use rags to clean a little dirt out of their guns and wounds at the same time? Some specific supplies to consider: Antiseptic, painkillers, splints, gloves, tweezers, stitches...

i was also thinking about some weapons for the spies when disguised as civilians like a umbrella  
shotgun:

a sword cane:

a throwing knife disguised as a comb:

maybe a super compact bow and some generic arrows:

and maybe something like a guitar case where you could hide a smg or a compact rifle:

i guess this is not yet in AIMNAS right? i crapped it twice with the tec-9 and the balisong , but i  
guess this would be a good idea .

Unfortunately, while weapons can be concealed in your inventory, they cannot be hidden in plain  
sight (i.e. disguised as something other than a weapon). In fact, Flug flat out refuses to discuss  
such things with me  
And bows, as always, look silly without proper animations.

---

Aye! I'm trying to prototype it, but I haven't used the XML editor before... I'm slowly learning my way around it now... This sort of stuff should be savegame-compatible, right? There is no internal code to infect someone with disease via a bandage, so you cannot achieve that. Changes to items are savegame-compatible.

DepressivesBrotUnfortunately, while weapons can be concealed in your inventory, they cannot be hidden in plain sight (i.e. disguised as something other than a weapon). In fact, Flug flat out refuses to discuss such things with me And I will happily continue that

The new-generation Polish combat rifle comes in two configurations, conventional and bullpup. The traditional pattern rifle isn't that interesting, but the bullpup looks pretty good.  
<http://www.sadefensejournal.com/wp/?p=2975>

Fully ambidextrous controls, but changing ejection side requires stripping the weapon.

The SRM 1216 compound-magazine-tube fed bullpup shotgun now exists in select-fire,

ok i already checked the game, and this are two things that would be really nice to have in the game.

First i thought in this one but i thought it was already in the game, but since i looked and it's nto there...

Mateba Unica 6 autorevolver in .44

and a DSA conversion kit for the FN FAL to a FN FAL PARA to make it shorter, lighter and maybe if it is possible (i'm not sure how conversion kits work in the game) make it able to use more kind of attachments.

---

[View Forum Message](#) <> [Reply to Message](#)

---

ikr! but as far as i know there's no .454 casul ammo in the game yet, i thought in asking for it but i

thought that would be excessive to make a new ammo type just for a handgun, maybe if we had more guns for that ammo type or not sure if there's already, but yea if smeagol wants to, .454 casul ammunition would be great.

I'm certain there's a rail-equipped FAL variant in the game already, but I think it has to be found/purchased that way. Adding an upgrade kit wouldn't be very difficult, but it's up to Smeagol to decide whether it's interesting enough to be worth it.

I can only find the original .280 prototype. Oddly enough, there don't even seem to be custom builds by private individuals.

As for the why though: BP only really caught on when we were already firmly in the 556 era, it has issues with making it ambidextrous and the weight distribution isn't ideal for controllability with high powered rounds.

---

---

Don't forget reach disadvantage in hand-to-hand combat :-P

All of those are solvable problems. There are already a handful of fully ambidextrous models in 5.56, and Magpul is working on a piece that appears to have the best combination of features yet. Ironically, it's already in the game, though I think it isn't in production yet.

Eh, not a huge difference really when you compare a carbine and a BP. I've seen convincing arguments being made for the point that ever since we dropped the full length bolt actions with their long bayonets, it's actually better to fight with your knife in hand and use the rifle as a parry stick.

And yes, you can work around the issues, but it is additional work and there's simply too little demand at the moment. Maybe if the current moods continue for a while and we do go back to a heavier calibre.

Posted by [DepressivesBrot](#) on Fri, 18 Sep 2015 22:24:10 GMT  
[View Forum Message](#) <> [Reply to Message](#)

Though this ... thing is semi auto and fires the full length .50s (and with the option to use a 20mm round in the future), that's another step up from the VSSK and likely places it in a different niche, probably merely obfuscating the shooter's position if it still uses super sonic loads.  
And with Things to Come, I lost my go-to objection to these monstrosities

---

---

Subject: Re: AIMNAS Item requests Part 2  
Posted by [Deleted.](#) on Fri, 18 Sep 2015 23:49:21 GMT  
[View Forum Message](#) <> [Reply to Message](#)

---

They say it's fully suppressed, this means it fires at subsonic speed, or it will not be "fully suppressed".

So the speed is roughly the same, under 300 m/s  
.50BMG bullet weight is 50g

higher energy than subsonic .50

So the only benefit of this twice as heavy rifle is a reduced recoil.  
And I doubt that even 20mm subsonic ammo will be effective against armoured vehicles.

---

---

Subject: Re: AIMNAS Item requests Part 2

[View Forum Message](#) <> [Reply to Message](#)

---

Eh, marketing. I doubt they completely cut the ability to fire standard ammunition and if there is a need, someone will produce heavier rounds as well.

I'm not saying this thing is better than a VSSK in its highly specialized niche, another 6kg is way too much for simply being semi auto.

I do however see this thing as having a lot more reserves when you aren't skulking around in the shadows.

Hey that would be nice, i dream with more animals, and finally civilian zombies that attack (and a better configuration for zombies like something with level progress).

I was thinking also for some stuff that could be useful.

sword sheath for the backpack slot:

would be nice to have where to put the katana if you want to have the gun slot free.

Plastic bags:

would be useful to compact clothes as a spy so you can keep them in smaller slots.

and finally: Ballistic face mask

i don't know why isn't already in the game

I'd love to request "distraction" items, something like small noise makers, purchasable rocks (yeah sounds stupid) or whistles etc...

I love playing with a small group during night ops and most of the time I have no means to attract a few of the queen's soldiers without raising the "alarm" (which means they go full speed ahead and call for reinforcements and everyone just goes amok running straight to the point of the noise from the other side of the map).

Would be great to see good old MK12 SPR Mod 0, but not as a modification to the M16 branch rifles, but as a standalone weapon in SN rifles section. With ol faithful 20 rnd 5.56 stanag clip, without autofire possibility and with slightly good stats, worthy of DMR class. Oh, and yes, in classical black color, of course. Would be great to see it in hand of enemy snipers early ( and

maybe not only ) on.

Can't share image since I haven't posted 10 messages so far unfortunately.

Now that Mini-12g shells are confirmed, will we get the Mag-7? I've always thought it was an interesting concept. Apparently the later models fixed most of the problems with the original too. Not very many left-side photos of it floating around, but I found a few in decent quality.

Well... regarding .40S&W mags:

31 rnd Glock mags are not so useful (we already have the 30 rnd SMG mags)

the 50 round drums however, will pobably make it in (but very likely only for SMGs).

22 rnd mags... hmmm... not so sure (maybe as 24 round mags, but that's a big maybe).

9mm 50 round drums are very likely out of the picture due to 50 round helix mags already existing.

Requests:

M30 Luftwaffe drilling  
Kampfmesser 42 (With throwing blade transformation)  
More WW2 German LBE (Something for those carrying Sturmgewehr, panzerfaust, machine  
gunner and various pouches for equipment)

Various Insights:

Grenades:

Those 3 variants of German stick grenades probably should have it set to be able to attach trip wire. It is said that after unscrewing the cap soldiers would rig up traps with them in city fights.

Karabiner 98k:

Ammunition - subsonic Nahpatrone(For use with HUB-23)

Attachments:

- 1) These rifles should probably come pre-equipped with a sling, this is how they were initially issued.
- 2) S84/98 III bayonet
- 3) Rifle Grenade Launcher: Schiessbecher
- 4) Sights: Zeiss Zielsechs 6x and Zielacht 8x

Mauser C96

Ammunition - (Possible oversight) From what I gather only holds 10 but listed as holding 15 ???

Lange Luger P08 / Artillery Luger

---

Ammunition - 32 round detachable drum (Trommelmagazin 08)

Erma MP40

(Possible Oversight) When stock is folded flash suppressor can fit but not when stock is unfolded

Sturmgewehr 44

Attachments:

1) Zielgerät 1229 infra-red aiming device

Wow, been a while since I came here.

Well, might as well dive back in: while I go off to try out the 8163 build and the latest version of AIMNAS, might I suggest some conversion kits for the Ingram M10/Cobray M11 SMG family? Lage Manufacturing does after-market uppers for the 9mm M11/9, the .45ACP M10, and the .380 M11, marketed as the MAX- series. They're also 'slow-down' kits, lowering the rate of fire to ~600rpm for the .45 version and ~700 for the 9mm breeds, and include Picatinny rails for accessories.

MAX-10/45 Mk.2:

MAX-11 Mk.2:

Both pictures include some aftermarket extras (looks like a foregrip and red-dot sight for the MAX-11, and a reflex sight of some sort on the MAX-10/45); whether they would come as part of the kit I leave it to the mod-maker's judgement. I'm mainly keen on these things because they look really cool and offer some expanded options for SMGs in the early-mid stages of a game, especially with the lower ROFs helping control ammo-expenditures.

Is there a way to insert an even louder version of the walkman trap? I deliberately set them off sometimes just to lure enemies into cross fire zones or ambushes but with big maps the range is just not enough and most soldiers are just too far away from it so I'm stuck detonating C4 or even editing the current walkman trap but seems a bit odd that you can hear an Ipod sized thingy playing loud from 500m away.

Also please, stones... what happened to them? I loved using them just for the same reason. Luring enemies, since I use small squad guerrilla tactics setting traps. Man this mod is so effing amazing for that, gotta love the rigging a shotgun with shredder ammo pointing at a door and leave it there while the walkman plays. Reminds of those damn traps of Fallout 3 and New Vegas.

Please and thanks!

someone talking about 1216 shotgun?  
its 12 gauge semi-auto shotgun with unique magazine system

it have cylindrical magazine 4x4  
u shot 4 shots and rotate magazine to get new 4 shots  
its very tactical weapon because u can have 4 different ammo types in 1 mag and switch between them  
this shotg(f)un should be added

this shotg(f)un should be added

Interesting!

Could make it in actually...

only problem I see atm is, that I'm unsure, if a gun could have more than 1 underbarrel attachment.

I would add it as a 4 shot shotgun with 3 underbarrel weapons that would have the same basic abilities. And you could toggle through the barrels with firing modes. Question is, if the game supports more than one underbarrel gun as attachment atm (if not, someone needs to code it first... but the gun actually seems worthwhile enough).

Thx Smeagol for interest  
or if no 3 underbarell attachment it is possible to do 16 rounds magazine in semiauto but u need spend ap to rechamber like pump action after 4 shots?  
and question about ammo  
why brenneke have so much damage (about 10x higher than normal slug)?  
maybe add birdshot to shotgun  
dragon breath ?  
there is also bullet called dragon ball that have additional slug to dragon breath  
and interesting ammo is taser ammo to shotgun  
it is ammo that have taser in shell and power source so u dont need reload after each shot and have longer range

i saw it on discovery and it was experimental ammo and its rare i think  
it would be better than rubber slug but more expensive and need more game progres  
and 1 thing about explosive shotgun ammo  
it have explosion like door breach charge and its no so lethal  
can it be done to have mini grenade effect in it like in AFS mod but less damage?  
same about crossbow  
there is explosive bolt but its micro explosive  
can it be done to shoot minigranade arrow like i Rambo3  
where Rambo shoot it at helicopter and it does BIG BOOM!!!  
but have really reduced range about 70%

last request is about Auto9 pistol  
ye Robocop pistol !  
its heavy modified berretta 93r that have longer barrel have compenstator and shoot full auto  
i love Robocop and this mod <3

Posted by [smeagol](#) on Thu, 26 May 2016 19:17:49 GMT  
[View Forum Message](#) <> [Reply to Message](#)

Ah well... seems like my idea doesn't work. The game only accepts one underbarrel gun, so the idea of having the rotating mags as additional underbarrels that can be toggled through doesn't work (and there seemed to be no love for the idea to code more than one UGL for a gun in the IRC).

So, either the 1216 (and the 1208 / 1212) ain't going to happen at all or I will have to add them with only the option to have 2 different kinds of ammo loaded (one in the main gun and one type in the UGL type rotating magazine). As of yet, undecided...

---

Subject: Re: AIMNAS Item requests Part 2

[View Forum Message](#) <> [Reply to Message](#)

Dual magazines is probably good enough. If you really wanted to go hog wild, the Neostead and KSG could be done the same way, plus there are some dual-feed capable machineguns specifically intended for having two different ammo types at the ready. I'm not sure any of those MGs are in the game, though.

The DP-12 double-barrel, double-magazine shotgun always alternates between tubes, I think, so I don't think the current framework would support it exactly. If you're interested in adding that one, it could be done either way. Artistic license, and all that.

i know about modified ar15 called gilboa snake that have 2 barrels and 2 magazines  
there is also double barrel with 2 magazines custom colt 1911  
there is double barrel ksg called dp12  
and double barrel custom remington 870 called 1740  
it is possible to do that db pump shotguns shooting with 2 shot burst?  
because u need pull trigger 2 times and pump  
when u shot 1 time and pump unfired shell is ejected  
i know about 2 revolver mag shotguns  
1 is russiann MTs  
and 2 is brazilian pentagun  
very funny is hi standard model 10 semiauto bulpub shotgun becouse compact version could be  
dualwielded-2 shotguns with 4 rounds magazine could be funny  
why there is no 10 gauge shotguns?  
and that polish 15 shot shotgun/gl is epic  
maybe for someone who use guirella tactics can be created from merging items remote car with  
explosives like killstreak from cod

There may be another programming approach to the quad-magazine problem. Would it be possible to do a variation of the system for the chambers of the magazine fed grenade launchers? Instead of six slots that accept one grenade each, there would be four slots that each accept a magazine object of appropriate size. The issue then is, does a framework exist to allow changing which slot is active? Most likely with fire mode command.

Correct, launchers simply use the first attachment (by internal order of slots) that satisfies the requirements of being launchable and 'splody, no switching involved.

While it would be possible to implement an attach-and-switch mechanism for magazines, it would be messy, have the potential for unintended sideeffects and be a lot of effort to model one gun's capabilities. Particularly if nobody is ever going to use those capabilities.

Came across something interesting. OSS Suppressors claim to allow all muzzle gas to escape

---

along with the bullet, but at such reduced pressure that they are at sound levels comparable to other suppressors. Since there are no baffles and all the muzzle gases escape at around the same time as the bullet does, there's minimal impact on the action of the weapon. Some of their models are in two pieces, which allows the user to select between minimum weight with light suppression or full weight and lower sound. Models in 5.56, 7.62, .338, .50. At a minimum, it's interesting from an engineering perspective.

<http://osssuppressors.com/suppressors/>

On the opposite end of the spectrum in the "joke weapon" category, I suggest the WWI experimental helmet-knife.

<http://www.atlantacutlery.com/p-3408-rare-experimental-wwi-hat-knife.aspx>

---

So, I just stumbled across some 42rd, AR-15 compatible magazines [1]. They'd be pretty redundant for the conventional rifles with their 60 and 100rd drum options, but it got me to thinking: Why not make an adapter that allows the 42rd AUG mags we already have to attach to the rest of the 556 bullpups which so far lacked any extended magazine option?

I just remembered now about this little glock to carbine conversion (and apparently also has a HK pistols version)

CAA RONI pistol to carbine conversion:

Yes please. Bullpups need some love too.

Karabinek MSBS-MSBS modular carbine  
its modular 5.56 nato rifle with bulpub and normal stock version  
which have modular parts

and can be switched  
to  
sub carbine  
carbine  
carbine+granade launcher  
dmr rifle  
light machinegun  
give this polish stuff to Steroid

Can I request for these (GPNVG-18) to be in?

Maybe make em have none or very little tunnel vision modifiers.

We already have binocular NVGs in the form of "Gen IV" goggles, so why not these? That being said the actual difference between the generations is the quality of the image, not the number of optical elements - be it monocular, bi-ocular or binocular.

And yes I know Gen IV is technically Gen III+.

Off topic : Really enjoy your latest offering. I must admit, I squealed with delight when I checked in the XML editor that you put in the Glock 20. More 10mm goodness!

Broni Strzeleckiej) and more polish stuff. In game are only 3 polish weapons and it should be changed soon to more

1. MSBS should be able to convert like SCAR using one kit. From classic (MSBS-K) to bullpop (MSBS-B) and back again. It is a multi caliber system since 3 days now Avalaibe calibers are:  
-5,56x45 (10, 20, 30, 60 and 100 round mag),  
-7,62x39 (28 and in production 30 round mag),

In real life it can fire all full auto 60 rounds without overheating barrell, so in game it also should be good as here. And about barrels, produced are 10 and 16 inch all modular of course. All MSBS project is in production so we can except dmr and iar/lmg with heavy barrell wariant soon.

2. there is a kbk and kbs beryl in game, but 7,62x39 version of kbs know as kbs beryl M762, produces for export and used by nigerian army.

3. before communism leaves poland in 1989 (officially), it developd kbs wz.88 tantal and kbk wz.89 onyks in 5,45x39, rifles like aks-74 and aks-74u but with some changes. there are a lot of ak/akm (not -47) clones around the world, little less of ak-74's.

4. pm-84 are polish smg, few version with some changes and ammo 9x19 and 9x18.
  5. p-15 (pr-15) pistol for 9x19, and compact officer's p-83 and p-64 for 9x18
  5. Karabin Bor (Alex), bullpop sniper rifle for 7,62x51 and 8,6x70 caliber. .338 lm is not a common caliber between rifles in game, so one more will be good.
- Hope to see those weapons in game
-

I have an adnotation to beryl ar and new wepons. In game Mini represants variant C and full size beryl A standart. To make it looks clear, there are 3 variants: A, B and C. A is clear gun, and C is full railed and have telescopic stock and B is beetwen this two. I sugest to add ingame mini beryl A version and fullsized beryl C version. before i forgot about beryl M545 is existing, just 5,45x39 version of the basic 5,56x45.

And few new polish guns:

- 9mm Makarov uzi-look-like submachine gun for vehicles crew members and citizen militia, imported to china, cuba, vietnam and east germany. The communism is strong with this on. Trivia, appears in DayZ Mod and some CoD game, rak in polish means crayfish and cancer. enjoy.
2. WKW Tor, Large-caliber sniper rifle bullpup rifle for .50 BMG used also imported to vietnam and arabs.
  3. UKM-2000 family lmg, basically pkm chambered to 7,62x51. UKM-2000D version uses folding stock. UKM-2000P modernized, added rails and improve ergonomics of use. And in 2012 UKM-2000P have been modernized and named UKM-2013 (such logic) and its look outstanding.
  4. Wist-94 pistol for 9x19 and Wist-94L with integrated laser, actually basic pistol in polish army.
  5. in post before i mentioned p-83 pistol, now i find out, there is also a two-row magazine compatible version of it named p-83m.
  6. in WW2 poland uses license bulid BAR, wz. 28 featuring pistol grip and using 7,92x57 mauser ammo. just take a look [www.youtube.com/watch?v=HwHJkc8YLEM](http://www.youtube.com/watch?v=HwHJkc8YLEM)
  7. in twenty years interwar, poland develops a big anti-tank mauser rifle named wz 35 Ur (7,92x107). it can take out every german tank simply by killing crew by shards which drop of from inside part of tank armor when bullet hits outside armor. why here? cause soviets had his anti tank rifle.
  8. czech's modern assault rifle CZ-805 BREN
  9. Samopal vz. 58 were also made with folding stock, but only fixed appears ingame. also both were made in czech's 7,62x45 cartridge.
  10. already in game are ump-45 and ump-9, but missing ump-40 for .40s&w.
  11. pbm/pmb/pb makarov pistol with integrated silencer, and apbs/apsb/apb stiechkin automatic pistol with longer barrel able to use with silencer.
  12. pkp pecheneg in bullpup version.
  13. pp-90 folding machine pistol, ancestor of fmg-9 in 9x18.
  14. in real life when tt-33 operating mechanism is damaged i can spray full auto, will be fun if this will be implemented.

Hello Smeagol

Grandma Gontarsky told me about some stuff

Polish shotgun based on akm called ZAH-1 only 1 made so maybe Bobby can sell it in used items?

ZAH-1 have 5 rounds box magazine and its pump action

i saw funny mossberg 500 upgrade that gives u 10 rounds drum detachable mag and some rails

there is tube magazine extension called xrail and it makes tubular magazine shotguns have about 20 rounds

there was concept of monolith arms 20 round p90 magazine style feeded pump shotgun called P-12 but dont know it was ever shooted

brasilian pentagun revolver shotgun and russian mts shotgun

I have more weapon propositions:

Russia

-9A-91 [9x39] carbine brother of VSK-94

-PSS silent double-action pistol using special piston SP-4 round.

-PPS-43 [7,62x25] it's tooks PPSH role as low cost pdw, often used in Warsaw Pact, perfect for Arulco.

-RPK-201 & RPK-203 - 5,56x45 and 7,62x39 export RPKs, same situation as with AK-100 series.

China

-QBZ-03 [5,8x42] modern chinese rifle

-CS/LR-3 and LR-4 [5,8x42 & 7,62x51] standard chinese sniper rifle

-Type 56 (QBZ-56) [7,62x39] just chinese AK with various buttstocks and carbine QBZ-56C

-Type 79 [7,62x25] chinese police's smg

-Type 67 (QJY-67) [7,62x54R] MMG

-Type 88 (QJY-88) [5,8x42] MMG

-Type 64 & 57 [7,65x17] silenced pistols

-Type 77 & 84 [7,65x17] mini pistols for high-rank officers

-Type 79 [7,62x54R] just SVD copy

-Hawk Shotguns / Type 97 Shotgun, pump action and semi-automatic shotguns, magazine and pipe feed also in bullpup.

-AMR-2 & M06 [12,7x108] .50 from china

-Maybe more not licensed copies of everything to poor Army of Arulco?

Finland

-TRG M10 - modular multi caliber sniper rifle system [7,62x51 & 7,62x67 & 8,6x70] yay.

-KK 62 - [7,62x39] that LMG could be Modern Art Masterpiece

-M78 - LMG/DMR in 7,62x39, 7,62x51 and 5,56x45

-Rk 76 (M76) more buttstock version pls and they made some in 5,56x45 also

## Romania

- LP-7 & PM md. 96 "Ratmil" [9x19] smg
- PM md. 96 "Asalt" [9x19] UZI copy in MP5 style, something you don't see everyday
- P md. 98 "Dracula" [9x19] licensed produced APS with option to put magazine as foregrip. How about removable stock/stock-holster for APS and some other?
- PM md. 63 & 65 [7,62x39] Romanian AKM with foregrip
- PM md. 86 & 87 [5,45x39] Romanian AK-74 with foregrip
- PM md. 80 & 90 both from above as carbine in both calibers, actually without foregrips
- PM md. 64 & 93 Romanian RPK in both calibers
- PSL md. 74 [7,62x54R] not a clone of SVD

## Serbia

- Master FLG & FLG-K [9x19] smg with cover from AK
- M77 AB2 + B1 [7,62x51] a battle rifle made from AK
- M77 - same as above but lmg
- M76 [7,62x54] dmr from AK
- M80 & M90 [5,56x45] from AK
- M93 [12,7x108 & 12,7x99] this .50 appears in Far Cry 3 and 4
- M21 [5,56x45] various version (also with rails) of well known Zastava's AK
- M84 [7,62x54R] copy of PKM, i won't be writing this but it's different, that woody stock.
- M91 & M91 N [7,62x54R] copy of SVD and it's modernized version.
- EZ9 & EZ40 - Zastava's pistols in 9mm and .40S&W

## Czechs

- OP-96 & OP-99 [12,7x108 & 12,7x99] mostly useless in JA reality due 2 rounds magazine
- CZ-805A1 rifle and CZ-805A2 carbine [5,56x45]
- Cz-806 [5,56x45] modularity has begun, at the time only with barells lenght.
- Sa 23/24/25/26
- UK vz. 59 [7,62x54R] MMG
- LK vz. 52-57 [7,62x39] LMG
- SP vz. 52 and 52-57 [7,62x45 and 7,62x39] replacemnt for SKS.

That is all for now what i found and consider "Could be".

I entered into AIMNAS Armory deeply and as result I formulate those requests.

1) More SMG magazine adapters for: 9x19; 9x18; 7,62x25 and 11,43x23.

Some SMGs using non standart ~30 round mag (Spectre M4 /w 50rd), and in game there is no intermediate between those and bulky 100rd Beta-C mags. Several SMGs already by default use drums and cannot use real life default casket mags (PPSh /w 35rd).

2) Same as above but for magazine fed shotguns. There are plenty of casket mag under 10 capacity.

3) Mag adapter 7,62x39 40rd. Designed for RPK, can be attached to almost any AK type gun. I

will be good to see them next to 5,56 42rd and 5,45 45rd mags.

Wiktor Suworow starts his book "Specnatz" with chapter with discription of true and forever love relationship between man and his spade (great book btw). Spade ingame is folding one, so why it can't fold? It would be used more often when it will occupy less space (some utility pouch, or even dedicated for example), not everyone have their big one and only gun slot always free.

#### New Weapons

Italy:

- AR-70/223 - normal italian service rifle.
- SC-70/223 - with folding stock.
- SCS-70-/223 - shorter barell with folding stock.
- AR-831 / AR-831FS [5,56x45] - meant to replace AR-70 but refuse that idea.
- AR-832 [7,62x51] battle rifle on -831.
- AR-871 / AR-871FS [5,56x45] - modernization of -831.
- ARX-160 [5,56x45][7,62x39] - modular assault rifle with 12'/16' barells for 5,56 and 16' for 7,62.
- ARX-200 [7,62x51] - build in cover of 160 but not modular.
- SCP-70/90 - folding stock version of AR-70/90.
- AS-70/90 - LMG from AR-70/90.
- Beretta Cougar (8000/8357/8040/8045) - pistol platform for many calibers.
- Beretta Nano - lil' pistol actually in use of indonesian navy.
- LF-57 [9x19] low cost machine pistol.
- LF-58 [7,62x33] carbine from days when .30 Car meant to be something more.
- LF-59 [7,62x51] not just copy of FN FAL.
- M1935 [9x17] - WW2 Era pistols.
- M1936 [7,65x17] -II-
- M1951 [9x19] - service pistol in many countries.
- M1951R [9x19] - when you need to spread in burst.
- PM-5 [12G] - magazine fed shotgun from Valtro.

-STF-12 [12G] - combat shotgun

Hungry:

- AK-55 - Just another copy of AK that this game needs.
  - AK-63F (AMM) [7,62x39] - Hungarian AK, not pistol grip.
  - AK-63D (AMMS) [7,62x39] - Hungarian AKS.
  - AMD-63 [7,62x39] - full lenght AK with foregrip.
  - KGP-9 [9x19] - Police SMG.
  - NGM-81 [5,45x39] - not many AK-74 clones were made.
  - NGV-81 [5,45x39] - this one with underfolding stock.
  - Gepard 3 [14,5x114] - HAMR with 10 round. Build to shot down helicopters.
  - Danuvia VD-01 [9x19] - Pistol with underbarell helical magazine of 33 round in size of brick.
-

Apologies if these items have already been added, or considered and rejected.

Food:

Vegemite. ( <https://en.m.wikipedia.org/wiki/Vegemite> ) A very iconic Australian bread spread.

Vegemite + bread = vegemite toast. Vegemite + cheese + bread = cheese and vegemite sandwich.

TimTams. ( <http://www.arnotts.com.au/products/tim-tam/> ) If you have never tried these then you need to stop reading this post and find some right now! Classics are the best.

Lamingtons. ( <https://en.m.wikipedia.org/wiki/Lamington> ) Can be eaten thawed or frozen. Only idiots add cream.

Weapons:

SMLE .303 Rifle. ( [http://www.imfdb.org/wiki/Short\\_Magazine\\_Lee-Enfield\\_\(SMLE\)](http://www.imfdb.org/wiki/Short_Magazine_Lee-Enfield_(SMLE)) ) This was the standard issue rifle in many British commonwealth nations for about 60-70 years. It was also

notable for being among the fastest, if not the fastest, firing bolt action rifle during that time. A very reliable and well liked weapon by those who used it.

Lewis light machine gun. ( [http://www.imfdb.org/wiki/Lewis\\_gun](http://www.imfdb.org/wiki/Lewis_gun) ) Issued to British commonwealth forces during WW1. Used the same ammunition as the SMLE above.

Bren Gun. ( [http://www.imfdb.org/wiki/Bren\\_Gun](http://www.imfdb.org/wiki/Bren_Gun) ) A very successful British designed weapon.

Browning M2 .50 cal heavy machine gun. ( [http://www.imfdb.org/wiki/Browning\\_M2](http://www.imfdb.org/wiki/Browning_M2) ) For mounting on the robot (or other vehicle?). Far too heavy to be carried and used in combat by a merc, should also be given such powerful kickback that it will stun a merc if they try to fire it.

M2 Mortar. ( [http://www.imfdb.org/wiki/M2\\_Mortar](http://www.imfdb.org/wiki/M2_Mortar) ) Mostly used during WW2 (and probably the Korean war) was small enough for paratroopers to make use of. I have always thought that this is what the commando mortar in 1.13 was based on.

Ammo:

G2R RIP. ( <https://youtu.be/mJGH7cDFw7c> ) Similar to hollow point ammo but far more devastating.

Clothing items:

Khaki Fur Felt Slouch Hat. ( <https://www.army.gov.au/our-history/traditions/the-slouch-hat> ) A very iconic piece of Australian military uniform recognised the world over. Perhaps this could be part of the starting gear for any Australian IMP merc with a military background.

Akubra broad brim hat. ( <https://www.akubra.com.au/shop-product/country-styles/snowy-river> ) Good luck trying to be a farmer in Australia without one of these. Also available with dangling corks? Trevor and Scully probably have one of these in the back of their wardrobe.

Bandana. ( <https://en.m.wikipedia.org/wiki/Kerchief> ) There is always a guy in the movies who is too cool for a helmet and wears a bandana instead.

With the the larger maps and greater number of enemy's do you think we could get tripod mounted M2 Brownings?

---

Subject: Re: AIMNAS Item requests Part 2  
Posted by [BattleGnome](#) on Mon, 06 Feb 2017 23:18:51 GMT  
[View Forum Message](#) <> [Reply to Message](#)

Tripod mounted Browning M2 would be tricky to be realistic with.

Tripod and weapon would be two different items and I doubt a single merc could carry both. They would be VERY heavy. They would be slow to set up: the tripod needs to be placed, and sand bagged to weight it down, then the weapon needs to be mounted, adjusted, and loaded... That could easily take two mercs two turns or more, not to mention how long it would take them to stop and fill the sandbags. None of this is something you want to be doing while you are being shot at. And once it is set up moving it would be a pain in the butt.

Maybe a tripod mounted version could be used by mercs but only if it was in-place before enemies entered the sector, as a defensive weapon?

Game balance also needs to be considered here. I know I'm the one who suggested Browning M2 but it needs to be done in a way that doesn't turn it into a super-weapon that completely dominates the battlefield. Being able to set up a series of M2 in a defensive position and just mow the enemy down wouldn't really be all that fun. At least with only one on the robot it helps keep the balance, imo.

BattleGnome wrote on Tue, 07 February 2017 01:18 Tripod mounted Browning M2 would be tricky to be realistic with.

Tripod and weapon would be two different items and I doubt a single merc could carry both. They would be VERY heavy. They would be slow to set up: the tripod needs to be placed, and sand bagged to weight it down, then the weapon needs to be mounted, adjusted, and loaded... That could easily take two mercs two turns or more, not to mention how long it would take them to stop and fill the sandbags. None of this is something you want to be doing while you are being shot at. And once it is set up moving it would be a pain in the butt.

While a .50cal machine gun sounds powerful it's not much above the .50cal snipers already in game.

Here some points that balance it a little.

1) The sheer weight of the gun, 58 kg makes it too heavy for any one to move.

So we break the gun down in to it's transport loads, of Receiver group(27kg), Barrel(10kg) and Tripod mount(19kg).

That a two person load of 30kg each and once you account for ammo that's a third.

2) The sheer weight of the ammo, each .50cal Cartridge is about 100 grams, so unless your superman you can't carry much ammo.

And machine guns use alot of ammo vs snipers.

3) The immobility of the gun, once set up the your not moving far, the weigh of the gun and ammo mean that the game will not let you run anywhere.

This means that snipers and mortars have a free rein to attack an easy target.

4) Worse sights and accuracy, the current .50cal snipers are more accurate and have better sights then a machine gun so the range of accurate fire will be lower.

5) Cost and rarity, while players can always cheat it's there own game.

A high cost and rarity for the gun and ammo put limits on the amount you can easily have.

6) With the new jeeps we have a target for the .50cal.

In other items i'd like to see this

-Heckler & Koch some time ago relased a HK-433. Construction linking advantages of G36 and G38 (HK-416). As for 21 century as it is easily configurable and comes with various barrels lenght.

-Also 7,62x35 (.300 BLK) round is now avalaibe in HK weapons, resulting in HK-237 which is G36 variant and HK-337 chambered from HK-416.

-HK-221 or the bad joke. When HK help heal British Small Arms they get hands on British licensed produced FN MAG documentation and decided to make a new gas operated MG. No words can express how big this was a failure.

-HK-416C a good fill for 416' family subcarbine with 9 inch barrel and folding stock.

-HK XM8 weapon system. A part of OICW project. As it happens often in history it ended canceled. Malasian Navy's PASKAL special group use it as well some PM Companies.

-Someone wonders, what diameter has LEGO's head? It's 10mm, and it fits .40S&W cartridge case perfectly. New Joke Ammo type?

New weapon: The Bitch / Bitch Gun

First, some back story to give context. When British and Commonwealth nations adopted the FN FAL (in the 50's / 60's) they produced it under license as the L1A1 SLR and it was a semi-auto only weapon, later the L2A1 was produced with a heavier barrel and larger magazine which was capable of full auto fire. Both of these weapons were used in the Vietnam war but the L1A1 was far more common.

Enter the Australian SASR who took to field modifying the L2A1 SLR (and sometimes the L1A1) to better suit the role of the SASR and the jungle environment. The resulting weapon was called "The Bitch" or the "Bitch Gun". Some commonality did exist but there was no standard bitch gun as each of the men who modified the weapon made it into what they wanted. Nearly all bitch guns had the barrel cut down and used the larger magazine of the L2A1 but after that it was very much the wild west. Some men had custom made front handguards with a built in foregrip, some men removed the front handguard completely and attached underbarrel grenade launchers procured from the Americans, others attached folding stocks (which FN FAL variants had but the SLR definitely did not).

The bitch gun was often carried by the forward scout in a five man patrol as the result of the cutdown barrels caused a much larger muzzle flash, and much louder sound, giving the impression that it was a larger calibre weapon than what it actually was and hopefully convincing the enemy they had encountered a large force, rather than a small special forces patrol, thus giving them time to disappear back into the jungle during the confusion.

I know we are trying to avoid endless variants of the same weapons but I feel this weapon is unique enough to be included.

(Note: the barrel modifications would have affected the weapons accuracy but in the jungle when nothing is more than 25 yards away it wasn't much of a concern)

Edit: trying to make the pictures post correctly.

New weapons

Belgium:

- FN CAL & CAL Para - before FNC was developed, FN little changed FAL to fit 5.56
- FN FNC Para - just FNC with shorter barrel and folding stock
- FN FAL 50.41 aka FAL LMG - heavy barrel version with bipod and 30rd 7.62 magazine
- FN 1949 - when era of semi-auto battle rifles starts to end, FN develop this rifle, available in many calibers
- FN MAG 10.10 - Jungle MAG, shortened and with folding stock
- SCAR PDW - modified to fit PDW role, compact and reliable
- SCAR SSR - dmr build on SCAR-H

France:

- Famas G2 comes also in following mods:
  - "Commando" with shorter barrel for special forces
  - "SMG" even shorter, still in 5.56
  - "Sniper" extended barrel and fit dmr role
- MAT 49/56 - longer barrel variant with fixed stock dedicated for gendarmerie
- PGM Ultima Ratio - widely used modular sniper rifle
- PGM Mini-Hectae - 8.6 version

Spain:

- Modelo L - developed of Modelo C to use 5.56, LC - carbine
  - CB-64 - modified copy of Sten in 9x23mm Largo
  - Z45 - improved MP-40 design, comes with folding and fixed stock, 9mm Largo
  - Z62 series - may look frugal but it's really good designed construction, one got in Ian's hand in Forgotten Weapons.
  - Z84 - compact and reliable smg in 9mm Para, still in use in Iranian Special Forces
- 
-

Mauser G11 - an experimental assault rifle designed and manufactured by Mauser. It was fed through an internal magazine of 10 caseless rounds. NATO trials proved the Mauser G11 unsatisfactory and the development of the G11 project was handed over to Heckler & Koch in the 1970s. The result was the Heckler & Koch G11.

Korobov TKB-022 - soviet experimental AR produced in 1968, was chambered for 7.62x39 mm M43 and also then-experimental 5.6x39 ammunition (which latter evolved into 5.45x39). Weapons were tested by Soviet army, but turned down on unpublished reasons (most probably because the gun was simple too advanced for contemporary military thinking, but also possibly because no-one at the time could tell for sure if plastic housing would hold its integrity in extreme weather conditions orduring many years of storage or use).

I decided heavily expand "why add" description to give weapons more chance under eye of smeagol. My before propositions was like "to do". Now it's all in one place together and more like "Hey, look at dat gan, it's really worth adding". I really hope it convince you to some of them.

Russia

-9A-91 [9x39] - At the beginning, weapon was meant to be 5.45mm but, russian army reject to interchange short carbine AKS-74U. concept evolve to 9x39 ammo. Army treat this gun as cheaper alternative for SR-3, later on that weapon VSK-94 rifle was designed. It will fits lower coolness 9x39mm weapon perfectly.

to this formation and sold for export. It should be consider due fact it's one of not many russian smg in 9mm Para.

-PSS - It's compact double action pistol using special piston SP-4 round with capacity of 6 round. Used cartirdge making it's one of the most quiet weapons. Gases expanding push the piston inside the round, giving bullet a lower velocity than normal for that kind of weapon but 7,62mm caliber do it's damage. Construction is pretty normal for handgun but used system no need longer suppressed barrel making it very compact weapon. Used in special forces and among secret police officers. It was revolution compared to previous brake-action assasination pistols. Only few entered western hands after all. It will make some contrast compared to low powered .22lr suppressed handguns and 9x19 Werlod

-PPS-43 [7,62x25] - Low price and easy to manufacture smg to replace PPSH-41, one of soviet working horses, used in USSR till 60s in non front units. Strongly exported to everyplace where was somebody fought for red star. Was in use in many asian countries and still in action i poorer part of africa. This is great weapon for poor arluco army.

-RPK-201 & RPK-203 - 5,56x45 & 7,62x39 - Just export RPKs, same situation as with AK-100 series. No more than "RPK in 5.56" I can write about them.

## China

-QBZ-03 [5,8x42] & [5,56x45] - After adoption and use of Type-95 family, Army require to design modern 5.8mm rifle in classic look. At first meant to replace previous rifles but ended up in Special Forces. Like many of chinese weapons not much is known. This weapon has it's five minutes in Homefront and Operation Flashpoint. It's will be nice expand for chinese cartridge.

-CS/LR-3 & CS/LR-4 [5,8x42 & 7,62x51] - For now it's standard chinese sniper rifle, replaced SVD clone. Someday chinese army wake up and realised they need a bolt-action sniper rifle, cause semi-auto dmr aren't perfect at longer ranges. So they design one. 5.8mm variant mainly for police and CT units and 7,62mm for army needs. Was mainly popularized due appearance in Battlefield 4. After all it's good sniper rifle, that AIMNAS wouldn't be a shamed

-Type 56 (QBZ-56) [7,62x39] - Just chinese copy of AK. But before it's get deleted. As it stand for china, weapon was really mass produced. Today in middle east or in africa, you can get shot by AK, but it's highly probably it's chinese one. Comes with various buttstocks and carbine version QBZ-56C. This one is one of few 7.62x39mm carbines made on AK. It's same situation like with Zastava's AK, so please add them.

-Type 79 [7,62x25] - It's chinese first generation SMG, interestingly made with gas piston. Designed for Police. Light and reliable, accept 20 rounds magazine. Shown in Kane & Lynch game. It's rather low coolness weapon so it will be great to see it among starting weapons in game, as it's kind of limited in models.

-Type 67 (QJY-67) [7,62x54R] - It was standard MMG in Chinese Army. Connecting mechanism of DP, RPD, ZB vz. 30 and Maxim. Not much is known anyway it's get adopted in few arabic and asian nations. 7.62x54R it's in limited use in game, especially in MMG, worth to add it.

-Type 88 (QJY-88) [5,8x42] - This one has somehow interesting story. Chinese command decided that army will now use less calibers, and it will be more interchangeable. So they decided to develop a intermediate caliber Machine Gun. And that's how Type 88 comes to life. Heavy like it was Main Purpose Machine Gun and firing to weak cartridge for it's purpose. It somehow do it's work, but is not perfect. Seen in few Battlefield titles and Crysis. Also some folding stock versions were made. It can be little lower coolness MG, and great expansion for 5.8x42mm ammo use.

-Type 64 & 67 [7,62x17] - Two silenced pistols for assassins and special forces. Not much is known about them. But it would be great so see some specialistic chinese arms.

-Type 77 & 84 [7,62x17] - Two mini pistols for high-rank officers. Take some from Walther and Makarov and later it become base for comercial type 77B. I think game need some really pocket pocket pistols.

-Type 79 [7,62x54R] - Just worse quality copy of SVD. But not to be deleted so quickly it may be lower coolness semi-auto dmr.

-Hawk Shotguns / Type 97 Shotgun - Series of pump action and semi-automatic shotguns. Magazine and pipe feed, also in bullpup. Developed to damping riots and open doors, nothing special for shotgun. But wide of configuration is something that draws attention.

-AMR-2 & M06 [12,7x108] & [12,7x99] Big caliber bolt action rifle. Not so accuracy for world standards, but enough for People's Army and for export to some poor countries. Develop to fit a great hole of firepower that sometime appears in tactical situations. It will be great for lower coolness AMR.

## Finland

-TRG M10 - Modular accurate multi caliber sniper rifle system [7,62x51 & 7,62x67 & 8,6x70]. That's all.

-KK 62 - [7,62x39] - Finland always used russian small arms. But in that situation RPK not to be fit for. Fins develop belt feed LMG. Simple, reliable and ugly as modern art masterpiece. But done

it's work. That LMG can be great expansion to 7.62x39mm LMG dominated by russian weapons.  
-Rk 76 (M76) - More buttstock version with compability with item buttstock and in 5,56x45 version too.

## Romania

-LP-7 & PM md. 96 "Ratmil" [9x19] - Cheap blowback SMG for Romanian police forces. SMG in AIMNAS are dominated by popular wester ones, and any less popular would be great I think.  
-PM md. 96 "Asalt" [9x19] - Something unique. Romanians modify Uzi to look like more classic SMG. Great for SMG kind in AIMNAS.  
-P md. 98 "Dracula" [9x19] - Romanians produced licensed APS with option to put magazine as foregrip. Also fire more popular 9mm Para cartridge. Great addition for automatic pisotls.  
-PM md. 63 & 65 [7,62x39] Another copy of legendary AKM but with foregrip, but still in use, because same reliable and only little less popular than original. Low budget armies, dicatatorships and militia won't be complaining about working gun.  
-PM md. 86 & 87 [5,45x39] Same as above, but of AK-74. Talibans beg you to add it.  
-PM md. 80 & 90 [5,45x39] & [7,62x39] both from above but as carbine in both calibers, actualy without foregrips. Great carbine in soviet calibers.  
-PSL md. 74 [7,62x54R] - Not an actual clone of SVD. May look like like SVD, but it's actually bulid on RPK, and somebody won't think of it well. Less accuracy due to long-stroke gas piston in opposition to short-stroke in SVD. Big mass moving throung the weapon. Still popular where somebody fought for liberty or dicatorship. Great lower coolness equavilent for SVD.

## Serbia

-Master FLG & FLG-K [9x19] - Another less popular SMG. Bulid on with cover from AK, avalibe also in MP5K and SAF-K dimensions. Good addition to SMG family.  
-M77 + AB2 + B1 [7,62x51] - Just a battle rifle made from AK, also avalibe with heavy barrel for LMG. Something that you don't see everyday.  
-M76 [7,82x57] - Interesting DMR made from AK that uses 7,92x57. Yugols after WW2 gets many of German 7.92mm ammo, and weapons for it. Later when they starts to produce licensed AK, suddenly many of former german small arms it appers in middle east and africa. Rifle widely used in Yugoslavia Civil War. Great Zastava rifle and revive for forgotten calibre.  
-M80 & M90 [5,56x45] - NATO ammo compatible AK, one of many Zastava's ideas to earn money and one of few non russian 5.56 AKs.  
-M93 [12,7x108 & 12,7x99] - Need of AMR appears also in Serbia. Zastava react to answer of the screm of need and developed bolt action M93. To incease chance of appearing in weapon market rifle is available in two 12,7mm calibers. This weapon appears in Far Cry 3 & 4 game. It's great quality Zastava product and also a great addition to somehow US-RU monopolized .50 weapons in AIMNAS.  
-M21 [5,56x45] - Still AK, but improved, also avalible with rails. Adopted by few agencies and special forces. The high tier rifle in Zastava's inventory and something that AIMNAS armory needs also.  
-M84 [7,62x54R] - Just copy Yugo copy of PKM. But it has less funtional woody stock.  
-M91 & M91 N [7,62x54R] - Not only a copy of SVD, great DMR and also avalible in more sceletonized version.  
-EZ9 & EZ40 - Not so popular Zastava's pistols in 9mm Para and .40 S&W. Maybe firsts serbian pistols in game.

## Czechs

- OP-96 & OP-99 [12,7x108 & 12,7x99] - DELIVERED, in both calibers?
- CZ-805A1 & A2 [5,56x45] - Czech modular assault rifle also a carbine. Saw attention in Battlefield game. Great high tier weapon for AIMNAS.
- CZ-806 [5,56x45] - Improved for experience for 805s. Great modern rifle available in various barrel lengths. Used by Czech army and few other armed forces.
- CZ-807 [7,62x39] - 806 brother in 7.62x39. Developed for current soviet ammo users. For now found it's place in French GIGN CT group.
- Sa 23/24/25/26 - One of the first after WW2 modern SMG, simple and reliable. Available in 9mm Makarov and 7.62mm Tokarev. Partially in game, but not all. Also exist with folding stock version. Used by Czechs and many african countries.
- UK vz. 59 [7,62x54R] - Czechs never really want to adopt soviet weapons, they prefer to manufacture their own. An example of that is this GPMG. Using light barrel this weapons wasn't good at suppressing in infantry variant but remain in use in Post Czechoslovakia state. Some of them have been seen in world gun graveyard - middle east.
- LK vz. 52 & vz. 52-57 [7,62x39] - Before replaced by vz. 59 GPMG, after war vz. 52 LMG was made, used at first with Czech made 7,62x45 ammunition but later rechambered to 7,62x39 same like vz. 52 rifle. It was a continuation of previous Zbrojovka Brno MG. But upper loaded magazine and disadvantages that comes with it make it quick perish from the army. Probably finding place in some other low budget militaries.
- SP vz. 52 [7,62x45] - Already in AIMNAS, but not with Czech made ammo.

## Italy

- AR-70/223 & SC-70/223 [5,56x45] - Berretta manufactured Standard Italian Army rifle that replace modified M1 Garands known as BM-59. And one of many "Black NATO rifle". This version was chambered for old 5.56mm ammo. Utilizing long-stroke gas piston and recoil spring located on piston, making it really easy convert to use folding stock but at the same time very heat intolerant. Surly AIMNAS need more of those "Black rifles" to make it's armory more diverse.
- SCS-70-/223 [5,56x45] - It's shortbarrelled carbine version with folding stock. Great carbine to be added.
- AR-831 & folding stock and AR-871 & folding stock [5,56x45] - Idea to born this rifles was to completely replace AR-70/223 and use newer 5,56mm cartridge. It was one of AR-10 derivatives, made by berretta rival SOCIMI. But lost it's chance for army adoption AR-70/90 modernization.
- AR-832 [7,62x51] battle rifle on -831.
- ARX-160 [5,56x45] & [7,62x39] - Modern fully modular assault rifle from Berretta with 12'/16' barrels for 5,56 and 16' for 7,62. Adopted in Italian Military and several other armies. Construction let to quick change barrels and calibers on field. Some militaries are interested in 7.62mm variant. Rifle appears in Battlefield title game. Great 21st century modular firearm that AIMNAS truly needs.
- ARX-200 [7,62x51] - build in ARX-160, but not interchangeable good quality battle rifle.
- SCP-70/90 [5,56x45] - folding stock version of already game included AR-70/90.
- Beretta Cougar (8000/8357/8040/8045) - pistol platform easily interchangeable.
- Beretta Nano [9x19] - Very little pistol for concealed carry actually find use in Indonesian navy.
- LF-57 [9x19] - Low cost SMG, gained some popularity in Italian forces, but soon get replaced by famous M.12.
- M1934 & M1935 [9x17] & [7,65x17] - Compact officer's pistol used by Italian Army in WW2.
- M1951 [9x19] - Great service pistol used in post war Italy and several other armies.
- M1951R [9x19] - Modification allowing to use burst fire, designed for special forces. But still pretty useless because high recoil and 10 round magazine.

- PM-5 [12G] - Good magazine fed shotgun from Valtro.
- STF-12 [12G] - Reliable combat shotgun, used by some CT units. Appears in Rainbow Six: Siege.

### Hungary

- AK-63F /D (AMM / AMMS) [7,62x39] - Hungarian made AK, popular in middle east. Available with fixed and folding stock.
- AMD-63 [7,62x39] - Another clone of AK, but with integral foregrip.
- KGP-9 [9x19] - Compact not popular police SMG.
- NGM-81 / NGV-81 [5,45x39] - Clone made from AK-74, This rifle was developed but not mass produced and Hungary decided to stay with 7.62x39mm.
- Gepard 3 [14,5x114] - Heavy Anti Material Rifle. One of those strange embodiment of technical thinking. Designed to shoot down helicopter and break shooter bones. Great modern very high caliber sniper rifles that AIMNAS needs.
- Danuvia VD-01 [9x19] - Odd pistol with underbarrel helical magazine of 33 round in size of brick.

### Belgium

- CAL & CAL Para [5,56x45] - Before FNC wasn't even planned, FN decided to change FAL inside and rechamber to use 5.56x45mm ammo.
- FNC Para - Just FNC with shorter barrel and folding stock dedicated to paratroopers, already partially in game with fixed stock variant.
- FN FAL 50.41 aka FAL LMG - Heavy barrel version of with integral bipod and high capacity 30rd 7.62 magazine. Short barreled version "Bitch gun" is already in game, but for higher precision falling suppression fits perfect.
- FN 1949 [Many] - Belgium gets late when comes to manufacture this weapon. Produced after war at the end of semi-auto internal magazine battle rifles era starts to end. FN rechambered this rifle for many calibers. Removable magazine version in 7,62x51 appears in Brazil.
- FN MAG 10.10 - Just jungle MAG, shortened and with folding stock. Greater at short ranges.
- SCAR PDW - Inside modified SCAR-L with very short barrel to fit PDW role.
- SCAR SSR - DMR version build on SCAR-H, used by US SOCOM.

### France

- Famas G2 was widely produced and comes also in following mods:  
"Commando" with shorter barrel for special forces  
"SMG" even shorter, still in 5.56  
"Sniper" extended barrel and fit dmr role
- MAT 49/56 - Version with longer barrel with fixed stock dedicated for Gendarmerie.
- PGM Ultima Ratio [7,62x51] - Accuracy modular sniper rifle, one of the best ones next to Accuracy International and SAKO rifles. Available with several barrels lengths.
- PGM Mini-Hectae - Scaled down 12,7mm Hectae to use 8.6mm ammo.

### Spain

- Modelo L - Developed from Modelo C (which develop to G3 and it's later variants) to use 5.56mm ammunition, also a carbine version named "LC" was produced.
- CB-64 - Modified copy of Sten to use in Spain. Available in 9x23mm Largo. Great for Arluco Army
- Z45 - Improved MP-40 design, comes with folding and fixed stock, 9mm Largo. Great for Arluco Army
- Z62 series - This SMG may look frugal but it's really good designed construction, one got in Ian's

hand in Forgotten Weapons. Available both in 9mm Para and 9mm Largo. Good for low budget army of Arulco.

-Z84 - Very compact and reliable smg in 9mm Para. Developed to be able to use second after getting of the water. Actually still in use in Iranian Special Forces.

And previous additions to put here:

-Heckler & Koch some time ago released a HK-433. Construction linking advantages of G36 and G38 (HK-416). As for 21 century as it is easily configurable and comes with various barrels length.

-Also 7,62x35 (.300 BLK) round is now available in HK weapons, resulting in HK-237 which is G36 variant and HK-337 chambered from HK-416.

-HK-221 or the bad joke. When HK help heal British Small Arms they get hands on British licensed produced FN MAG documentation and decided to make a new gas operated MG. No words can express how big this was a failure.

-HK-416C a good fill for 416' family subcarbine with 9 inch barrel and folding stock.

-HK XM8 weapon system. A part of OICW project. As it happens often in history it ended canceled. Malaysian Navy's PASKAL special group use it as well some PM Companies.

-MSBS-5.56K & MSBS-5.56B & MSBS-7,62N [5,56x45] & [7,62x39] Modular caliber small arms

(MSBS-B) and back again. Available with 10' and 16' barrels. Heat-tolerant, reliable and ergonomic. Also a 7,62x39 variant using STANAG mags is available. In development are 7,62x51 battle rifle, 7,62x51 Designated Marksman Rifle and 5,56x45 Light Machine Gun. If everything went good it will be the best small arms weapons system.

-Kbk wz. 96 Beryl M762 [7,62x39] - Caliber conversion of Beryl for export, already in use in Nigerian Army

-Kbk wz. 88 Tantal & Kbs wz. 89 Onyks [5,45x39] Polish AKS-74, father of Beryl rifles. There aren't many 5,45mm AK rifles. And this rifle is great fulfillment for Beryl rifles in game.

-PM-63 "RAK" [9x18] - DELIVERED, however someday want to see it with 15 and 25 round mag.

-PM-84 [9x19] - SMG widely used in police and prison guard. Great improvement of Uzi ideal.

modernisation of MAG-95 and MAG-98. Reliable and accurate pistol, great sidearm to see in AIMNAS.

-Bor rifle (Alex) - [7,62x51] & [8,6x70] - Modern bullpup bolt action sniper rifle developed used in Polish Army.

That's all, uff.

Szcczelec wrote on Sat, 06 May 2017 11:46-KK 62 - [7,62x39] - Finland always used russian small arms. But in that situation RPK not to be fit for. Fins develop belt feed LMG. Simple, reliable and ugly as modern art masterpiece. But done it's work. That LMG can be great expansion to 7.62x39mm LMG dominated by russian weapons.

It sure is ugly, but reliability is most certainly not one of its virtues. Could be because the guns

were made in the 60s (and still in use), but based on my own and others' experiences, the Kk 62 is bloody horrible: it jams a lot, has a safety that is thoroughly unreliable, is prone to uncontrolled discharges when dropped, and it's about as ergonomic as a bag of rocks. Its pistol grip also doubles as the charging handle, which just doesn't make any fucking sense whatsoever. The designers should've been sent to Siberia for that, and I'm only half-joking.

Great Britain:

- AW50 (12,7x99) - AW bolt action rifle scaled up for 12,7mm. Adopted as standard .50 in many countries. Great fill for AI rifles.
- AS50 (12,7x99) - One of few semi-auto .50 cal rifles. Fast, ergonomic and accurace. Chooosen by navy seals due it's rof.
- MC-51K (7,62x51) - If 8,3' barrel MC-51 was ridiculous with it's hard recoil and unrealibity. Then K model is abnormally short ranged, unaccurace, uncontrollable and even more unrealiable sick's man idea with completly no real field purpose that utilize barrel about twice long as 7.62x51 cartidge.
- L34A1 (9x19) - Integrally supressed Sterling SMG. This reliable SMG saw use in Vietnam and

even Falklands islands. Why not in Arulco?

-Sten MK.2S (9x19) - Cheap well known Sten with integral suppressor. Widely used in WW2 and by US Special Forces in Vietnam.

Szcclec wrote on Sat, 06 May 2017 11:46I decided heavily expand "why add" desription to give weapons more chance under eye of smeagol. My before propositions was like "to do". Now it's all in one place together and more like "Hey, look at dat gan, it's really worth adding". I really hope it convince you to some of them.

Serbia

-Master FLG & FLG-K [9x19] - Another less popular SMG. Bulid on with cover from AK, avalibe also in MP5K and SAF-K dimensions. Good addition to SMG family.

-M77 + AB2 + B1 [7,62x51] - Just a battle rifle made from AK, also avalibe with heavy barrel for LMG. Something that you don't see everyday.

-M76 [7,82x57] - Interesting DMR made from AK that uses 7,92x57. Yugols after WW2 gets many of German 7.92mm ammo, and weapons for it. Later when they starts to produce licensed AK, suddenly many of former german small arms it appers in middle east and africa. Rifle widely used in Yugoslavia Civil War. Great Zastava rifle and revive for forgotten calibre.

-M80 & M90 [5,56x45] - NATO ammo compatible AK, one of many Zastava's ideas to earn money and one of few non russian 5.56 AKs.

-M93 [12,7x108 & 12,7x99] - Need of AMR appears also in Serbia. Zastava react to answer of the screm of need and developed bolt action M93. To incese chance of appearing in weapon market rifle is avalibe in two 12,7mm calibers. This weapon appears in Far Cry 3 & 4 game. It's great quality Zastava product and also a great addition to somehow US-RU monopolized .50 weapons in AIMNAS.

-M21 [5,56x45] - Still AK, but improved, also avalibe with rails. Adopted by few agencies and special forces. The high tier rifle in Zastava's inventory and something that AIMNAS armory needs also.

-M84 [7,62x54R] - Just copy Yugo copy of PKM. But it has less funtional woody stock.

-M91 & M91 N [7,62x54R] - Not only a copy of SVD, great DMR and also avalibe in more sceletonized version.

-EZ9 & EZ40 - Not so popular Zastava's pistols in 9mm Para and .40 S&W. Maybe firsts serbian pistols in game.

I am bit late, perhaps, but I think we have both M76 and M77 LMG in game. M76 might be in 7,62x51mm version. As for other weapons, I don't see how they bring anything more to the mod.I am not even sure Master SMGs ever entered serial production - I believe they made test batch, looked at it and said: "Hell, no, we already have MP5 and it is cheaper." Never understood why you need AK based 9 mm weapon, but, hey... M80/85 might be interesting, but I think M93 is bitch to use. Used M84, never had any issues with it, but it is PKM. EZ9 is last version of SiG P226 copy I think. It is usefull and good weapon, but really, doesn't bring anything new to the game.

My point would be, in more broad aspect, that diversity of weapons in the mod is great already.

Yes, M76 and M77 are in game, my bad. Master was mass produced, but not actually used in serbia.  
I'm agree that diversity is huge already, but there's MUCH MORE weapons constructions in world.  
It still can be enlarged, to look less sterile. We can only give new propositions after all.

Spain part 2:

- STAR Models: A (9x23 Largo), B (9x19) and P (11,4x23) - STAR's tradition was to make copies. Found place in market and mass produced M1911 copies in various configurations and calibers. Approved by Jules.
- STAR Megastar (10x25 & .11,4x23) - Strong design, huge weight and impressive magazine capacity for the 90s (.45 12rd, 10mm 14rd).

Switzerland part 1:

- MPX & MPX-K & MPX-SD (9x19) - Weapon family with competitive price and strong export potential, also one of few smg that fire from closed rotated bolt and utilize gas piston.
- SG 510-[1/2/3/4] - Switz's early cold war era delayed blowback battle rifle firing 7,5x55 Swiss (WA-2000 is also chambered for this) ammunition from 24 round mags. Seen few embodiment in 7,62x51 for export and also consider as service rifle for finland in 7,62x39. Trivia: Former swiss soldier can take one home but converted to semi-auto.
- SG 540 & 542 - folding stock version gib pls. SG 543 - carbine of 540.
- SG 553 & 553R - Little improved 552 model, also available in 7,62x39.
- B&T VP-9 (9x19) - Welrod is not dead! Idea remains the same, but today aimed mostly at dying animals instead nazis. Would love to see this in game.
- B&T APR - Modular bolt action rifle in 7,62x51 / 8,6x70. Further evolution of PGM UH. In service around the globe.
- MG 50 - MG 51 rival in MMG category for Switzerland. Adopted in Denmark in .30-06 cal.
- MG 51 - Further evolution of MG 42, adopted in 7,5x55. Still remain in use in Swiss Army.

Hi. I've been playing AIMNAS for a while and I have some suggestions and unaccuratnesses to share. I hope somebody decision-making look at them with understanding :] So let's begin.

I'm FAL guy, and what i saw here hits me where it hurts the most. My suggestion is to rename normal FAL to "FAL 50.00" and it's folding stock variant whenever will be added to "FAL 50.61" as in real life. Folding stocks are really cool things, no doubt. Why it hasn't get popular here yet? Next, Para FAL to foldable "FAL 50.63". FAL also comes with LMG variant "FALO 50.41" with heavy barrel, bipod and extended 30rd magazines. About those high capacity mags, using them

in infantry FALs was a common practice, Commonwealth FALs could also use curved Bren 7.62 Mags but that's a tidbit only with no utility in game. Adding .308 Adapter (also for H&K G3 and it's LMG mag fed variants if they make into the game) will be great enhancement of firepower.

I was thinking about also some less known, innovate, jungle/bush war related weapons in my opinion worth checking and adding:

Carl Gustav M/45, CZW 438, Nagant M1895, VHS-2, PSL-54, RP-46, PSS pistol, Stoner 63 weapons system, Madsen LMG, EM2, vzor 38M, Colt MARS, Barret M95.

And mistakes, I shouldn't post it here, but I don't want to split the message:

Owen should be using 9mm Para instead .45 ACP.

Sterling should be using 34 round mag.

Scorpion EVO 3 being never produced and EVO A3 using wrong cartridge, for what I know, it's only 9mm Para.

PM-63 and it's Chinese copy shouldn't use 20 round. 15 or 25 are the ones that exist. Simplify?

OK, but vzor 61 has 10 and 20 round mags for the same purposes.

Some FALs use 25 round mag, those are aftermarket, factory ones are 20, 30 and 50 round drum only.

My another rant. Some gun values in game are taken from nowhere. AR-10 has -2 reliability, this is very untrue, biggest users Portugeses Paratroppers said it was not only accurate but reliable in african difficult conditions. They also use shorter Para AR-10, which i would love to see. Also Beretta M12 with (-1) and UZI-family with (-2), facts collide here. Simple and reliable, thus popular. Coming to AK-derivatives, INSAS (+2) is this good that in danger zones soldiers are issued with AK, while INSAS goes to cities, this rifle and its family is known for its problems mainly. Next thing is Beryl-family, those use (+1) value while being one of the most reliable AKs.

Weapons propositions:

Auto-5 sawed off, beloved by prohibition era gangsters.

M1887, first successful repeating shotgun, originally designed for black powder, but there's tons of reproduction of 12G modern powder.

M1897 "Trench Gun", during WW1 this trench cleaner was this effective want to ban use of shotguns in wars

M16A3, an A2 with A1 trigger group resulting in full auto 20 inch rifle

SVU-A, fully automatic version of SVU. To capitalize full auto 20rd mags were designed, if this would come with adapter for rest dragoonovs.

M240L, PKM was an undisputable king of GPMG, MAG was good but heavier, this variant is -18% (!) lighter than standard M240.

Talking about PKs, Bulgarians tried to make it more compact, introducing PKM Commando (<https://i.pinimg.com/originals/50/6d/ea/506dea618a8f54296a0279532dd95393.jpg>) add [https](https://boards.4chan.org/k/thread/35983275/msbs12) Zulfikar, modular rifle from Iran to replace domestic production G3.

AM-17 5.45, AMB-17 9x39 are new generations replacement for many AKS-74U variants currently in use.

MSBS family, I've seen them mentioned here multiple times, but recently they revealed 12G automatic dual action mag feed shotgun (<https://boards.4chan.org/k/thread/35983275/msbs12>) add [http](http://boards.4chan.org/k/thread/35983275/msbs12)

I'm not saying UZI represents god's gunsmiths level. By the word reliable is mean that it's working in certain resonable conditions, In my values scale (-2) is too low for that gun, without going into extremness.

I'm back! with another terrible yet intriguing idea.

A upper conversion for the Cobray M11 that allows you to put on Calico magazines in 9mm or there's also one for the ones in .22 lr

[/youtube]

Now i kinda got 2 requests, both of them quite overkill.

Barrett XM109 in 25mm

And the Norinco QLZ87 automatic grenade launcher

They're guaranteed to make quite a mess.

too soon?

-XM556 Microgun

[/youtube]

Also maybe the Mondragon rifle 7mm mauser and the HK32 in 7,62x39

Ah sry, one last thing, i just got a little into the \*OA-93 (wrong gun sry ) , it'd be cool to have more stuff for AR pistols and such, i thought about having some sort of automatic conversion/bump-stock or maybe just a binary trigger that allows you to shoot 2 rounds bursts without the auto fire function?

Any chance we could see the Thompson Arms Contender make it into the game? I saw it in 1.13 (only stuck in .454 Casull) but it seems to be absent in AIMNAS?  
It's probably one of the coolest guns out there because of how easy it is to convert to other calibers. Perfect for Arluco ammo scavenging

With conversion barrels could allow it to switch to:  
.22LR .45 Gov .410 .40 S&W (not sure about this one?) .357 .44 .454 Casull .223/5.56

Also, the Japanese Self Defense Force, Howa Type 64 (7.62mm NATO)

And their more modern Howa Type 89 "Buddy" (.556 NATO)

I make icons myself, so I'd be happy to lend a hand if you need it

May I ask again for this?

I would like to suggest again the following:

.458 SOCOM with upper receiver for M4  
stock for Mauser Pistol  
original stock for Beretta R93  
stock for Stechkin APS, Pernach, Droik  
H&K VP70 with stock

That Howa looks nice and all, unfortunately, the item size is waaaaaaaaay too big (120x50 pixels is maximum size for the big item) and also from the wrong side... Barrels always point the other way. ;)

---

---

Oh that's a scaled up picture of it. I've got the actual one facing the other way in the proper size.

[http://s000.tinyupload.com/?file\\_id=09371849936414151245](http://s000.tinyupload.com/?file_id=09371849936414151245)

Here you are, this is the STI file :)

"Another salient feature of the MSG90 is the push-pinned trigger housing. By first removing the stock, the shooter can quickly replace the semi-automatic trigger group and housing with a unit that facilitates fully-automatic firing. Essentially, the MSG90 differs from the the PSG1 in its ability

to be deployed as a support weapon. Of course, it is not as ideal in this role as is a more dedicated weapon like the 21E, which is equipped with a belt-feed mechanism and a quick-change barrel. Nonetheless, the search for faster follow-up shots ends here.

In short, the MSG90 is a multi-purpose weapon that offers an unparalleled balance of precision and firepower. Other G3 variants, including the PSG1, are more application-specific for various reasons. The PSG1's size and weight certainly enhance its astounding accuracy at distances previously deemed beyond the capabilities of a semi-automatic rifle, but these attributes have an inverse affect on mobility. The MSG90, on the other hand, sacrifices neither accuracy nor mobility at normal engagement ranges in, say, an urban environment. Even a fully-automatic G3 or 21E can be fitted with quality optics, but battle rifles and machine guns (like their users) are perhaps best confined to their intended roles. The idea behind the MSG90 is that it transcends these boundaries while providing law enforcement and military units with the utmost in tactical flexibility."

Out of curiosity what is the timeframe for added weapons in game? Don't see too many striker fired autoloaders, what about a few newish models like SIG P320 series, Walther PPQ CZ P10 maybe?

Now here's a completely stupid idea. Absolutely deranged, more like.  
The sledgehammer. What if you could use it to just bust items up? Just in case you REALLY want to be able to sell something to Jake but your gear's too good. Good condition? We can fix that! He only deals in junk, if you know what I mean.

Not even sure you can do something like this... but you know. :d

Not even sure you can do something like this... but you know.

The cleaning kits at least in early 1.13 UC, as well as the screwdrivers in iirc BtB could magically improve or degrade a weapons condition, (quite a surprise to find that out the hard way by using the highlighted tool in bad condition on the just repaired gun, just out of curiosity;), i.e. on use of the kit the condition of both items became the average of ((condition A) + (condition B))/2.  
so I guess it may be already doable by adding the specific property/flag to all desired items?

As a sidenote, playing usually on insane with 15k & increased profile costs, etc I would have to be quite desperate to do that, assuming I would not stay away from selling any items in a war zone which potentially fuel more violence.

"The G3SG/1 is a sniper rifle based on the G3. It consists of a full size G3 that has been handpicked for accuracy. A special trigger group, bipod, cheekpiece and 1.5-6x scope have been fitted. The intricate G3SG/1 trigger group has a button to set the trigger just behind the trigger itself. It is one of the best designed trigger groups to this day and still allows for automatic fire."

"The HK 33SG/1 is a similar sniper development of the HK 33 as the G3SG/1 is of the G3. Most of the rifle is similar to the full size HK 33. The barrels are handpicked for accuracy, a cheekpiece and bipod are fitted and a 1.5-6x Zeiss or Schmidt & Bender scope was fitted as standard. The trigger group is replaced by a set trigger group that allows for semi automatic and full automatic fire. In semi automatic fire a button behind the can set the trigger for a very light and crisp trigger pull."

I just got back into JA2 AIMNAS, after a long while away, and after tinkering with the starting-gear XML for a while, I've found there's something missing in terms of baseline gear: plain fatigue-style clothing, like the solid-colour uniforms worn in WW2 and Vietnam. Their value as actual armour should be minimal (although fatigue tunics could be combined with body-armour vests as normal), and each piece would provide less camo to the appropriate terrain (olive-drab for woodland or jungle, beige for desert, black for urban or night) than the appropriate camo uniform (currently woodland/desert camo tunics are 18% and pants 12% -- perhaps make fatigues 9% and 6%?). Each set would be a baseball cap, a tunic, and a set of trousers, making 8 base items that would need art and tabledata (AIMNAS already has a black baseball cap, as of the 8796 release, and that could be a good starting point). They wouldn't offer much tactical advantage, but it'd be a godsend in terms of providing options to modders and starting gear-choices for the... cheaper recruits offered by smaller operators (\*kof\* M.E.R.C. \*kof\*). :a

For that matter, refreshed art for the jeans would be wonderful; the current pictures look more like urban-camo BDUs (and indeed could be recycled to portray a cheaper version of Urban BDU Pants with lower stats). :)

Another quick item request: the Steyr MPi-69 and/or the Steyr MPi-81. Both were taken off the market in 1990 when the Steyr TMP came along, but they'd make nice 'historical leftover' weapons. And while I know some might ask if the game really needs another couple of Uzi-lookalikes... well, does it really need all those Kalashnikov-derivatives, either?

References:

[https://en.wikipedia.org/wiki/Steyr\\_MPi\\_69](https://en.wikipedia.org/wiki/Steyr_MPi_69)

<https://modernfirearms.net/en/submachine-guns/austria-submachine-guns/steyr-mpi-69-eng/>

(Note that the MPi-81 has a 'firing port' version, featuring an extended barrel and Steyr-AUG optics, which could make a nice 'unique' weapon for certain mercs, RPCs, or NPCs.)

As something of a nod of the head to recent events, I'd like to request the Fort-12 semi-automatic pistol. It holds a 12-round magazine of either 9x18mm Makarov or (in the Fort-12 Curz model) .380ACP, which are both pistol-cartridges that are a little under-represented in the game at the moment.

5.45x39mm 7BT4 BT (AP-T)

5.45x39mm 7N6 PS (FMJBT;SAP)(unhardened steel core penetrator)(nasty russian tumbling semi-armour piercing bullet)

5.45x39mm 7N6M PS (FMJBT;ESAP)(modernized)(hardened steel core penetrator)(nasty russian tumbling semi-armour piercing bullet)  
5.45x39mm 7N10 PP (EAP)(heat-strengthened steel core)(increased penetration)  
5.45x39mm 7N22 BP (AP HCSC)(hardened carbon steel core)  
5.45x39mm 7N24 BS (AP-HC Tungsten)  
5.45x39mm 7N39 PPBS (AP-HC Tungsten)(increased penetration)(1.8x higher penetration comparing to 7N24)  
5.45x39mm 7N40 (SAP Match)(purpose-manufactured sniping ammo)  
5.45x39mm 7U1 US (AP-HC Tungsten Cold)(Subsonic;Low Velocity)  
5.45x39mm Hornady V-Max varmint

7.62x25mm AKBS (Match)  
7.62x25mm FMJ43 (This round cannot boast great penetrative power, however, it has a significant stopping power effect compared to other cartridges of the same caliber used by the army.)  
7.62x25mm LRN (Match)  
7.62x25mm LRNPC (Match)  
7.62x25mm P-41 (API)  
7.62x25mm PT (Tracer)

7.62x39mm 7N23 BP (AP HCSC)(hardened carbon steel core)  
7.62x39mm 7N37 (AP-HC Tungsten)  
7.62x39mm 57-N-231 PS (FMJ;SAP)  
7.62x39mm 57-N-231P PST (FMJ;SAP-T)  
7.62x39mm 57-N-231(89) PS (FMJ;ESAP)(Improved)(heat-strengthened steel core)(1,5-2x higher penetration comparing to 57-N-231 PS)  
7.62x39mm MAI AP (SLAP-HC Tungsten)  
7.62x39mm BZ (API)  
7.62x39mm PZ (HEI)

7.62x39mm Z (Incendiary)

7.62x54mmR BS-40 (API-HC Tungsten)  
7.62x54mmR BZT (API-T)(worse penetration comparing to 7BZ3)  
7.62x54mmR D (Ball Heavy)(Long Range)  
7.62x54mmR DD (nasty russian Dum-Dum)  
7.62x54mmR "EXTRA" (SPBT Heavy Match)(Long Range)(purpose-manufactured competition/hunting/sniping ammo)(This ammo is extremely accurate and rare to find these days, get this ammo while you can.)  
7.62x54mmR WOLF "EXTRA" (FMJBT Heavy Match)(Long Range)(purpose-manufactured competition/hunting/sniping ammo)(BC 0.491 (G1))  
7.62x54mmR Jackal (Steel-cored AP round with rear container filled with mercury matrix)  
7.62x54mmR L (Ball Light)  
7.62x54mmR LS (Ball Light Cold)  
7.62x54mmR LPS (SAP Light Match)(purpose-manufactured sniping ammo)  
7.62x54mmR LPS ST-M2 (SAP Light Match)(improved version of LPS)(better penetration and accuracy comparing to LPS)(purpose-manufactured sniping ammo)  
7.62x54mmR L-41 (JHP)

7.62x54mmR "cartridge with a heavy surrogate bullet" (SAP Heavy)(Long Range)  
7.62x54mmR P (HE)  
7.62x54mmR PZ (HEI Phosphor)  
7.62x54mmR Smerch (AP-HC Double Core)(experimental round with dual-core (WC and steel) AP projectile and multi-stage propellant. Capable to put most .50 cal penetrators to shame)  
7.62x54mmR Yprit (Steel-cored AP round with rear container filled with poisonous gas. Probably, just an urban legend. Or not.)  
7.62x54mmR Z (Incendiary)  
7.62x54mmR 7N1 PS (SAP Match)(improved version of LPS)(better penetration and accuracy comparing to LPS)(purpose-manufactured sniping ammo)(BC 0.402 (G1))  
7.62x54mmR 7N13 PP (EAP)(increased penetration)  
7.62x54mmR 7N14 SNB (EAP)(Long Range)(purpose-manufactured non-match-grade sniping ammo)  
7.62x54mmR 7BZ3 BZ (API)

penetration than 7N13 PP)  
7.62x54mmR 7N37 BS (AP-HC Tungsten)  
7.62x54mmR 7N60 (DUDS)

9x18mm 7N15 BZhT (APSHS)(solid hardened steel)  
9x18mm 7N16 PMM (SAP +P)(High Velocity)  
9x18mm 7N25 PBM (AP-HCSC)(hardened carbon steel core)(High Velocity)(better armour penetration comparing to PMM)  
9x18mm PPe (HP-SAP)  
9x18mm PPT (Tracer)  
9x18mm PS PPO (Ball Cold EPR)  
9x18mm PSO (Ball Cold)  
9x18mm Pst (SAP)  
9x18mm PSO (Match)  
9x18mm PSV (HP Cold)  
9x18mm RG028 (HP-AP)  
9x18mm RBCD TFSP  
9x18mm Buffalo Bore JHP +P  
9x18mm Buffalo Bore HC-FN +P

9x21mm 7N42 (EAP)  
9x21mm 7U4 (EAP Cold)(Reduced Charge;Low Recoil)

9x39mm 7N8 SP-5 (match-grade fmj ball round intended as default ammo for VSS rifle. Use both steel and lead cores.)  
9x39mm 7N9 SP-6 (armor-piercing round intended as default ammo for AS rifle. Use hardened steel penetrator core.)  
9x39mm 7N12 BP (Improved armor-piercing round with larger steel penetrator.)  
9x39mm BS (Tungsten-core AP round for countering heavy body armor.)  
9x39mm PAB-9 (AP +P)(modification of the SP-6 cartridge)(low-cost version)(slightly increase the damage and penetrating ability due to the deterioration of accuracy)  
9x39mm SPP (Improved 7N9 round with enhanced penetration and sniper-grade accuracy.)  
9x39mm Jasmin (Special load with acid-filled projectile.)

12.7x55mm LP (Light supersonic sabot-born lead bullet with an aluminum core.)  
 12.7x55mm TP (Heavy subsonic lead bullet)  
 12.7x55mm STs-130 (standard)  
 12.7x55mm STs-130PT (increased accuracy)  
 12.7x55mm STs-130PT2 (increased accuracy)(solid bronze bullet)  
 12.7x55mm STs-130VPS (increased penetration)(double core)

12.7x108mm B-30 (AP)  
 12.7x108mm B-32 (API)  
 12.7x108mm 7-BZ-1 BS (API-HC Tungsten)(Ballistics similar to B-32)  
 12.7x108mm BZF-46 (API Phosphor)  
 12.7x108mm BZT-44 (API-T)(worse penetration comparing to B-30, B-32)  
 12.7x108mm BZT-44M (API-T subdued tracer)(worse penetration comparing to B-30, B-32)  
 12.7x108mm MD (HEF)  
 12.7x108mm MDZ-3 (HEFI)  
 12.7x108mm MDZ-46 (HEFI)  
 12.7x108mm Nammo MP (multipurpose projectile with armour-piercing effect and enhanced fragmentation effect to the "light targets" designed for troop's combat operations)  
 12.7x108mm Nammo MP-T (multipurpose projectile with tracer with armour-piercing effect and enhanced fragmentation effect to the so-called light targets designed for troop's combat operations)  
 12.7x108mm PZ (HEI)  
 12.7x108mm T-38 (Ball Tracer)  
 12.7x108mm 12.7SL (API Duplex)  
 12.7x108mm 12.7SLT (API-T Duplex)  
 12.7x108mm 7N34 12.7SN (FMJ;AP Match)(heat-strengthened steel core)(Long Range)(purpose-manufactured sniping ammo)

14.5x114mm B-32 (API)  
 14.5x114mm B-39 (AP)  
 14.5x114mm BS (API-HC Tungsten)  
 14.5x114mm BST (AP-HC-T Tungsten)  
 14.5x114mm BZT-44 (API-T)(worse penetration comparing to B-32&B-39)  
 14.5x114mm BZT-M (API-T subdued tracer)(worse penetration comparing to B-32&B-39)  
 14.5x114mm MDZ-M (HEFI)  
 14.5x114mm PZ (HEI)  
 14.5x114mm DGJ02 (APIDS-T Tungsten)  
 14.5x114mm DGE02 (APHEI)

5.56x45mm AP4 (AP-HC Tungsten)(successor to M995 developed by Nammo, better performance at range, albeit with lower velocity)  
 5.56x45mm AP45 (AP-HC Tungsten)(upgraded version of AP4)  
 5.56x45mm AP/Subsonic (AP-HC Tungsten Cold)  
 5.56x45mm APM (Armor Piercing Match)  
 5.56x45mm Barnes TSX BT (Triple-Shock X)  
 5.56x45mm CBC TW12 (55-grain steel core round with external ballistics similar to M193 but considerably better armor penetration)

5.56x45mm DSG XMP (Super-heavy tungsten penetrator. Excellent penetration.)  
 5.56x45mm DUDS  
 5.56x45mm GP90 (FMJBT EPR)  
 5.56x45mm HEI  
 5.56x45mm L31A1 (FMJ;Ball EPR)  
 5.56x45mm Liberty Ammunition M855A2 (FMJBT;Ball;SAP EPR +P)(High Velocity)(High Pressure)(Long Range)(Liberty Ammunition's improved version of M855A1. Better in every way.)  
 5.56x45mm M193 (FMJBT;Ball)(High Velocity)(nasty NATO yawing, tumbling and fragmenting ball bullet, resulting in devastating wounds.)(making long-range accuracy a problem.)  
 5.56x45mm M193A1 (FMJBT;Ball +P)(High Velocity)(flatter trajectory)(High Pressure)(Hotter version of M193 with superior velocity and range.)  
 5.56x45mm M196 (Tracer)(High Velocity)  
 5.56x45mm M855 (FMJBT;Ball)(High Velocity)(unhardened small steel penetrator)(The M855 is ideal for a squad automatic weapon, but not a rifle where accuracy of the single shot is more critical than laying down a heavy volume of fire on buildings, vehicles or other barriers.)  
 5.56x45mm M855 LF (FMJBT;Ball Lead Free)(High Velocity)(the M855 "lead free" ball cartridge has a bullet with a conical steel insert and a tungsten composite core in a copper alloy jacket.)  
 5.56x45mm M855A1 (FMJBT;Ball;SAP EPR +P)(High Velocity)(High Pressure)(Long Range)(Guess what - it tumbles. Yeh! Even at long range.)(semi-armour-piercing solid copper core, and is tailored for use in rifles with shorter barrels such as the M4A1 carbine. It provides more consistent performance compared to the M855)  
 5.56x45mm M856 (Tracer)(Long Range)(the M856 tracer cartridge has characteristics similar to the M196 tracer with a slightly longer tracer burnout distance. The M856 is ballistically matched to the M855 ball cartridge. The tracer bullet delivers a visible red light signature through its trajectory. The M856 does not have a steel penetrator.)  
 5.56x45mm M856A1 (FMJBT Tracer EPR +P)(High Velocity)(High Pressure)(Long Range)  
 5.56x45mm M995 (FMJBT;AP-HC Tungsten)(High Velocity)  
 5.56x45mm M995A1 (FMJBT;AP-HC Tungsten EPR +P)(High Velocity)(High Pressure)(Long Range)  
 5.56x45mm M1159 ADVAP (The US Military's newly-adopted AP loading. Outstanding properties against body armor and barriers.)  
 5.56x45mm MBA Concealment (poisoned silent round designed for assassination and taking out checkpoints)  
 5.56x45mm MEN AP/Subsonic (AP-HC Tungsten Cold)  
 5.56x45mm MEN DM11A1 (FMJBT;SAP/Double Core)(German equivalent to U.S M855 but superior in accuracy)  
 5.56x45mm MEN DM31 (AP-HC Tungsten Match)(superior to M995 against ceramic armour)  
 5.56x45mm MEN DM41A1 (FMJBT;Ball)(no steel penetrator)(German equivalent to U.S M855 but superior in accuracy)  
 5.56x45mm MEN M193 (FMJBT;Ball)(High Velocity)(similar to U.S M193 but superior in accuracy)  
 5.56x45mm MEN Match 4,5 g (Excellent precision)(Ideal match ammunition)  
 5.56x45mm MEN SAP Match  
 5.56x45mm MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)  
 5.56x45mm Mk 262 Mod 0/1 (OTM-BT Match)(purpose-manufactured sniping ammo)  
 5.56x45mm Mk 318 Mod 0 (OTM-BT Ball EPR Match)(decreased muzzle flash)  
 5.56x45mm Mk 318 Mod 1 (OTM-BT Ball EPR Match)(decreased muzzle flash)(increased ballistic coefficient)

5.56x45mm RUAG DM11 (FMJBT;Ball;SAP/Double Core)(Swiss equivalent to U.S M855 but superior in accuracy)  
5.56x45mm 69 Grain OTM-BT Razor Core (the round improves long-range accuracy, stopping power and lethality for automatic rifles, compared to standard 5.56mm Ball rounds. Developed for Special Forces, the round incorporates advanced Open Tip Match technology and is designed for long and short barrel weapons)  
5.56x45mm 77 Grain OTM-BT Razor Core (the round improves long-range accuracy, stopping power and lethality for automatic rifles, compared to standard 5.56mm Ball rounds. Developed for Special Forces, the round incorporates advanced Open Tip Match technology and is designed for long and short barrel weapons)  
5.56x45mm Reduced Range (FMJ)(Reduced Charge;Low Recoil)  
5.56x45mm SSA AP (SLAP Tungsten)(High Velocity)(Tungsten-core SLAP load with high velocity and excellent armor penetration. Will clear Level IV plates with ease.)  
5.56x45mm Swiss-P (HPBT EPR Match)  
5.56x45mm Tipped Match King (HPBT Match)(updated version of Mk262 with superior wounding)(purpose-manufactured sniping ammo)  
5.56x45mm Warmageddon

7.62x51mm APM (Armor Piercing Match)  
7.62x51mm BCP FMJ  
7.62x51mm DSG XMP (AP-HC Heavy Tungsten)(due to low (but still supersonic) velocity

trajectory is rather steep, but incredible barrier/armor penetration, inflicting almost .50 BMGish damage)

7.62x51mm FA 66 (Duplex)(Low Recoil)

7.62x51mm FA 67 (HE)(Low Recoil)

7.62x51mm LC 70 (HE-T)

7.62x51mm HEI

7.62x51mm MAI AP (capable of sub-MOA grouping)

7.62x51mm MEN DM41 (FMJ;Ball)(German equivalent to U.S M80 but superior in accuracy)

7.62x51mm MEN DM111 (FMJ;Ball)(long range)(German equivalent to U.S M80 but superior in accuracy and range)

7.62x51mm MEN DM131 (AP-HC Tungsten Match)

7.62x51mm MEN DM151 (AP-HC Tungsten)

7.62x51mm MEN HPC (AP)(high performance core)

7.62x51mm MEN AP/Subsonic (AP-HC Tungsten Cold)

7.62x51mm MEN Match 10,9 g (Highest precision for highest demands)(Ideal match ammunition)

7.62x51mm MEN Match 11,7 g (Highest precision for highest demands)(Ideal match ammunition)

7.62x51mm MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)

7.62x51mm M77 (Incendiary)

7.62x51mm M80 (FMJ;Ball) (standart issue ball ammo)(Long Range)

7.62x51mm M80A1 (FMJ;Ball EPR +P)(enhanced projectile round)(High Velocity)(flatter trajectory)(High Pressure)(Long Range)(It travels at higher velocities and has better ballistics and range, it's great at barrier penetration and is more effective on targets at all ranges.)

7.62x51mm M118 (FMJBT Match)(purpose-manufactured sniping ammo)(BC 0.494 (G1))(the excessive muzzle flash during low light shooting that was a concern for concealment as well as night vision use.)

7.62x51mm M118SB (FMJBT;Ball Special)

7.62x51mm M118LR (HPBT Match)(Long Range)(purpose-manufactured sniping ammo)

7.62x51mm M198 (Duplex)

7.62x51mm M276 (Tracer subdued)

7.62x51mm M852 (HPBT 'Mexican Match')(purpose-manufactured sniping ammo)(the bullet was very accurate at around 300 - 600 meters (competition match ranges) but suffered at longer ranges)(The accuracy improvement over the M118 Match ammo was remarkable, often shooting as much as 50% tighter groups.)

7.62x51mm M948 (SLAP)

7.62x51mm M959 (SLAP-T)

7.62x51mm M993 (AP-HC Tungsten)

7.62x51mm M1158 (proposed ADVAP round to replace M993. features improved penetration)

7.62x51mm Mk 316 Mod 0 (HPBT Match)(purpose-manufactured sniping ammo)(about .5 MOA at both 300 and 600 yards.)(Additionally, calcium carbonate was added to the powder which drastically reduced the muzzle flash of the new ammo.)

7.62x51mm Mk 319 Mod 0 SOST (Open Tip Match EPR)(enhanced behind barrier performance, enhanced function and casualty and muzzle flash requirements in short barrel carbines)

7.62x51mm Pacific Technica LC/70 (DUDS)

7.62x51mm Pindad 85 (Incendiary)

7.62x51mm RUAG RM (APHEI)

7.62x51mm RUAG Swiss P AP (AP-HC Tungsten)(with secondary lead core. considered to be higher threat, than M993)

7.62x51mm Stiletto BS12 (APHEI)  
 7.62x51mm Stiletto BS14 (AP-HC Heavy Tungsten)  
 7.62x51mm Ultra Nosler (Double core)(The bullet is loaded with two separate lead cores with a solid partition between them. The front part is torn quickly, delivering great energy. The base remains intact and provides deep penetration, even when hitting bones.)  
 7.62x51mm 168 Grain Match OTM-BT Razor Core  
 7.62x51mm 175 Grain Match OTM-BT Razor Core  
 7.62x51mm 220 Grain Subsonic OTM-BT Razor Core  
 7.62x51mm 240 Grain Subsonic OTM-BT Razor Core  
  
 .308 Win. MEN AP-HC Tungsten  
 .308 Win. MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)  
 .308 Win. MEN Subsonic Ball Cold  
 .308 Win. MEN Subsonic Quiet Hinder Cold  
  
 .300 AAC BLK M62 Tracer  
  
 .300 WM MEN AP-HC Tungsten  
 .300 WM MEN DM121 (Ball Match)  
 .300 WM MEN DM131 (AP-HC Tungsten Match)  
 .300 WM MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)  
  
 .30-06 Spring DUDS  
 .30-06 Spring M1 Incendiary  
 .30-06 Spring M14 (API)  
 .30-06 Spring M14A1 (API)(improved core design and incendiary charge)  
 .30-06 Spring M25 (Tracer subdued)  
 .30-06 Spring Pomeroy (HE)  
 .30-06 Spring Remington SPRG Accelerator 55 Grain (.224 bullet inside a .30 plastic sabot)(High Velocity)  
 .30-06 Spring T99 (HEI)(Low Velocity)  
 .30-06 Spring T100 (HEIAP)(High Velocity)  
  
 .303 British VII - VIIIZ Ball  
 .303 British VIIIZ Ball Heavy  
 .303 British BPD 39 (Incendiary Phosphor)  
 .303 British DUDS  
 .303 British Mark VIIF (SAP)  
 .303 British K Holland Cordite (HE)  
 .303 British R Mark III (HE)(powerful high-explosive)  
 .303 British O.1 (HEI)  
 .303 British Pomeroy PSA (HE)  
 .303 British Sierra Matchking HPBT (high quality civil ammo)  
 .303 British SR 43 BVIIIZ (Incendiary Phosphor)  
 .303 British VPT 41 (API)

7.7x58mm Arisaka (HE)  
7.7x58mm Arisaka (HEI Phosphor)(large incendiary charge)

.338 Lap. Mag. MEN Match  
.338 Lap. Mag. MEN SAP  
.338 Lap. Mag. MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)

.45 ACP FMJ Incendiary  
.45 ACP FMJ Incendiary Tracer  
.45 ACP Lasermatch FMJ Tracer  
.45 ACP FMJ Tracer

.50 BMG FN HEPI (alternative to the Mk 211 Raufoss)  
.50 BMG KICM (SAPHEI)(despite lacking tungsten core, it penetrates even better than Raufoss)  
.50 BMG M1 AP (heat-strengthened steel core)  
.50 BMG M1 (Incendiary)  
.50 BMG M1 (Tracer)(Trace range: 1,969 yards (1,800 m))  
.50 BMG M2 AP (AP-HC Tungsten)  
.50 BMG M2 Alternate AP (The bullet differed from the standard AP M2 cartridge with a core of less scarce manganese-molybdenum steel FXS-318)  
.50 BMG M2 Ball  
.50 BMG M8 (API-HC Tungsten)(slightly worse penetration than M2AP)(The design is based on the Soviet B-32 armour-piercing incendiary bullet.)  
.50 BMG M10 (Tracer subdued)(Trace range: 100 - 1,859 yards (91 - 1,700 m))  
.50 BMG M17 (Tracer)(Trace range: 2,679 yards (2,450 m))  
.50 BMG M20 (API-T subdued)(penetrate even better than M8, due to core with high molybdenum content)(Trace range: 328 - 1,914 yards (300 - 1,750 m))  
.50 BMG M21 (Tracer)(Trace range: 550 yards (503 m))  
.50 BMG M23 (Incendiary)(large incendiary charge)(High Velocity)  
.50 BMG M33 (FMJ;Ball)  
.50 BMG MEN SAPI (solid steel projectile, featuring pyrophoric titanium tip instead of legacy incendiary compounds)  
.50 BMG Mk 169 Mod 2 (APEI)  
.50 BMG Mk 169T Mod 2 (APEI-T)  
.50 BMG Mk 211 Mod 0 Raufoss (HEIAP)  
.50 BMG Mk 211F3 Raufoss (HEIAP Improved)  
.50 BMG Mk 257 (API-DT)(subdued tracer)(features double valleys to reduce bearing surface thereby decreasing friction and increasing stability)  
.50 BMG Mk 263 Mod 2 (AP)(features double valleys to reduce bearing surface thereby decreasing friction and increasing stability)  
.50 BMG Mk 300 Mod 0 Raufoss (HEIAP-T)  
.50 BMG Mk 300F3 Raufoss (HEIAP-T Improved)  
.50 BMG M903 (SLAP HC Tungsten)(High Velocity)  
.50 BMG M962 (SLAP-T HC Tungsten)(High Velocity)  
.50 BMG M1022 long-range (Ball Match)  
.50 BMG M1022 long-range sniper (Ball Match)(purpose-manufactured sniping ammo)  
.50 BMG NM173 (API-HC Heavy Tungsten)

.50 BMG NM185 (AP-HC Heavy Tungsten)

.50 BMG XM Western (HEFI)

7.92x57mm Mauser B. Patrone (FMJBT HEI Phosphor)

7.92x57mm Mauser B.-v Patrone (FMJBT HEI Phosphor)(High Velocity)(flatter trajectory)

7.92x57mm Mauser F Patrone (FMJBT API)(WWI)

7.92x57mm Mauser Gift Patrone (Poison Cold)(poisoned silent round designed for assassination and taking out checkpoints)

7.92x57mm Mauser L.S. Patrone (Ball Light)(High Velocity)

7.92x57mm Mauser L.S. Patrone L'spur (Ball Light Tracer)(High Velocity)

7.92x57mm Mauser M/88 Patrone (FMJ Ball Heavy)(for old pre WWI Mauser Rifles)

7.92x57mm Mauser Norma Sierra Match King (FMJBT Ball Match)(high quality civil ammo)

7.92x57mm Mauser Norma Sierra Match King (FMJBT Ball Heavy Match)(high quality civil ammo)

7.92x57mm Mauser P.m.K. Patrone (FMJBT API Phosphor)

7.92x57mm Mauser P.m.K.-v Patrone (FMJBT API Phosphor)(High Velocity)(flatter trajectory)

7.92x57mm Mauser Pz Panzer Patrone (APSHS)(solid hardened steel)(better armour penetration comparing to S.m.K.)

7.92x57mm Mauser S. Patrone (FMJ Ball)(WWI)(standard issue Rifle ammo)(BC 0.337 (G1))

7.92x57mm Mauser S. Patrone für M.G. (FMJ Ball)(WWI)(standard issue Machinegun ammo)(BC 0.321 (G1))

7.92x57mm Mauser S.Pr. (FMJBT Ball Incendiary)(WWI)

7.92x57mm Mauser s.S. Patrone (FMJBT Ball Heavy Match)(Long Range)(standard issue Rifle ammo)(BC 0.593 (G1))

7.92x57mm Mauser s.S. Patrone für M.G. (FMJBT Ball Heavy Match)(Long Range)(standard issue Machinegun ammo)(BC 0.557 (G1))

7.92x57mm Mauser s.S. Patrone für Scharfschützen geeignet (FMJBT Ball Heavy Match)(Long Range)(purpose-manufactured sniping ammo)(BC 0.595 (G1))

7.92x57mm Mauser s.S.-Anschußpatrone (FMJBT Ball Heavy Match)(Reduced Charge;Low Recoil)(Due to their precision they were also popular with snipers.)

7.92x57mm Mauser s.S.-v Patrone (FMJBT Ball Heavy Match)(High Velocity)(Long Range)(flatter trajectory)

7.92x57mm Mauser s.S. Nahpatrone (FMJBT Ball Heavy Match Cold)(Low Velocity)

7.92x57mm Mauser S.m.E. Patrone (FMJBT SAP)(unhardened iron core penetrator)(standard issue Rifle and Machinegun ammo)

7.92x57mm Mauser S.m.E. Patrone für Scharfschützen geeignet (FMJBT SAP Match)(unhardened iron core penetrator)(purpose-manufactured sniping ammo)

7.92x57mm Mauser S.m.E. Patrone L'spur (FMJBT SAP-T)(unhardened iron core penetrator)

7.92x57mm Mauser S.m.E. Patrone L'spur 100/600 (FMJBT SAP-T subdued tracer)(unhardened iron core penetrator)

7.92x57mm Mauser S.m.E. Nahpatrone (FMJBT SAP Cold)(unhardened iron core penetrator)(Low Velocity)

7.92x57mm Mauser S.m.E. Anschußpatrone (FMJBT SAP)(unhardened iron core penetrator)(Reduced Charge;Low Recoil)(Due to their precision they were also popular with snipers.)

7.92x57mm Mauser S.m.E.lg. Patrone (FMJBT SAP Heavy Match)(unhardened iron core penetrator)(Long Range)(standard issue Rifle and Machinegun ammo)

7.92x57mm Mauser S.m.E.lg. Patrone für Scharfschützen geeignet (FMJBT SAP Heavy Match)(unhardened iron core penetrator)(Long Range)(purpose-manufactured sniping ammo)

7.92x57mm Mauser S.m.E.lg. Patrone 1945 (FMJBT SAP Heavy Match)(unhardened iron core penetrator)(Reduced Charge;Low Recoil)(Due to their precision they were also popular with snipers.)  
7.92x57mm Mauser S.m.E.lg Nahpatrone (FMJBT SAP Heavy Match Cold)(unhardened iron core penetrator)(Low Velocity)  
7.92x57mm Mauser S.m.K. Patrone (FMJBT AP)  
7.92x57mm Mauser S.m.K. Patrone 12.8g (FMJBT AP Heavy)  
7.92x57mm Mauser S.m.K. Patrone L'spur/Gl'Spur (FMJBT AP-T)  
7.92x57mm Mauser S.m.K. Patrone L'spur/Gl'Spur 100/600 (FMJBT AP-T)(subdued tracer)  
7.92x57mm Mauser S.m.K.-v Patrone (FMJBT AP)(High Velocity)(flatter trajectory)  
7.92x57mm Mauser S.m.K.-v Patrone L'spur/Gl'Spur (FMJBT AP-T)(High Velocity)(flatter trajectory)  
7.92x57mm Mauser S.m.K.-v Patrone L'spur/Gl'Spur 100/600 (FMJBT AP-T subdued tracer)(High Velocity)(flatter trajectory)  
7.92x57mm Mauser S.m.K.(H) Patrone (AP-HC Tungsten)(High Velocity)(flatter trajectory)  
7.92x57mm Mauser Sellier & Bellot SPCE (Soft Point Cutting Edge)(high quality civil ammo)

9x19mm AP 6.3 (cartridge with a two-part controlled fragmenting projectile, an armor-piercing bullet that features a brass sabot and a hardened steel penetrator of 6.3mm.)  
9x19mm Buffalo Bore Outdoorsman Hard Cast FN 147-Grain (deep-penetrating)  
9x19mm Fiocchi 147-Grain JHP 9APDHP (excellent accuracy)(very good-penetrating)  
9x19mm Hornady Critical Duty FlexLock +P 135-Grain (very good accuracy)(excellent-penetrating)  
9x19mm MEN DM91 (AP-HC Tungsten)  
9x19mm Pist.Patr. 08 m.E. (SAP)(unhardened iron core penetrator)  
9x19mm Pist.Patr. 08 s.E. (SAP)(solid sintered iron)

13x64mmB Sprenggranatpatrone L'spur (HEF-T)  
13x64mmB Brandsprenggranatpatrone L'spur/Gl'spur (HEFI-T)  
13x64mmB Brandgranatpatrone (Incendiary)  
13x64mmB Brandgranatpatrone L'spur/Gl'spur (I-T)  
13x64mmB Panzergranatpatrone L'spur/Gl'spur (AP-T)  
13x64mmB Panzerbrandgranatpatrone (Phosphor) (API)

That's just about every weapon in the world. Back in 1998, i was happy when i got my hands on a Mini 14. It was great help until weapons with longer ranges started appearing. Steyr AUG, M16, M14,FN FAL, M24 and Dragunov. That was already a great selection to choose from and it made you appreciate the new weapon that you've just got.

In !.13, yes, there is a great selection of weapons, which makes choice a bit more complicated. But trying to include every weapon and caliber in the world, really ruins the appetite. Pan Metron Ariston.
