Hi everyone.

I thing i must be dumb because i try million times to install JA2
on my android device, read almost all forum, try few ways but still dont working... just black screen
after settings and back to dashboard. If someone have a video with step by step tutorial how to
install this awesome game on android devices, please share with us on youtube... please help!

and sorry for my english..

I have the same problem. I've tried installing every version I could find looked at every forum I
could find, and still can't get it to work with a right mouse button functioning. Only v.19 works for
me.
