Hi folks.

I would like to edit with items are available to select in the new IMP gear selection screen. Could someone point me to a file I need to edit? Will notepad do, or do I need to use XML editor?

Using Arulco Folding Stock.

You'll have to edit TableData\Inventory\IMPItemChoices.xml. Notepad is sufficient and don't forget to update <ubNumItems> to reflect added or deleted items.

I think thats for the old style of IMP gear generation, one where you get items based on your stats and traits. I want to edit items available in the NEW gear selection, where you can choose what gear you start with.

The new system takes the items from the same file. The only difference is that instead of random assignment you can select the items yourself.
