Hey,

I just went down to the mine of Drassen to eliminate Aliens. However there is bug - I cannot move my squad (or mercenary) down south. There is just no this special icon which could allow to move into another sector. Western, Eastern and North works OK.

I use newest stable version at 1366x768. I changed resolution, alt-tabbed and nothing works.

Another thing - is there easy way to order ammo for weapons we already have? BobbyRay is one big mess to find suitable ammo for weapons.

I forgot to add - there is very annoying bug with Ja2 1.13 where it freezes from time to time. There is no rule when, but it can happen quite frequently.

I play on Win_10 and tried to use various things like XP compability. Without success. Game is playable but you have to save quite often.

About the freezes take a look here :

<http://thepit.ja-galaxy-forum.com/index.php?t=msg&th=22166&prevloaded=1&&start=40>

Since i used imagecfg to enforce my computer to only use a single core it never feezed again.

Thx, I already played with "fixed" DLLs but without registry fix I guess.

Also Windowed Mode won't work in my case so I have to focus on fullscreen. By the way what about my problem with moving mechanism? I cannot progress because I cannot go to southern sector in mine.
