"Assertion Failure (Line 1893 in file Queen Command.cpp)"

40 enemies just entered Balime (L11) and when I click "Go To Sector" I get this error every time.

ja2_7609en+AI_r525.exe

ja2_7609en+AI_r525.exe

Ja2+AI is unofficial release, you should not post bugreports in official 1.13 threads if you use it.

If you want to help fix bug, you need to provide all information:

- mod you are using
 - ini files that you changed
 - save game just before the bug appears
-

OK. Sorry about posting in the wrong forum.

No mods. Just 7609, and either the AI or FIX exe's. It happens on both exe's.

I changed the default INI, but that's it.

How do I share the SAV file please?

fightcancer wrote on Mon, 23 October 2017 05:11 It happens on both exe's.

Then maybe it's stock 1.13 bug or something with the map.

Upload on dropbox or something.

The bug occurs sometimes in the FIX exe and the 7609 exe. The bug occurs always in the FIX+AI exe.

I'm not sure if I have to invite specific users to view the shared file. Here is is.

Stable 7609 is old and not supported. You need to update to actual unstable release.

If you want to make a bug report for Ja2+AI or Ja2+fix, you need to do it in appropriate thread.
You also need to supply all needed information about your game version/mod/changed ini settings and how to reproduce the bug.
