I seem to be unable to get into Sector K-12. There is enemies there and when I get to place my mercs I am unable to place them in the highlighted areas. It doesn't matter if I approach from the South or the East. Any help?

This happens in several maps in several mods, and even occassionally in the original game. Usually setting mercs to "spread out" and then moving them individually to a location solves this. Worth a try i guess.

Roadkill is right.
Happened me too.
